

WATER CYCLE EXPERIMENT KIT

R49800

Perfect for hands-on science learning, this interactive kit guides students through the stages of evaporation and rainfall. Kids can color the fun artwork with crayons or permanent markers, add water, and place the kit in front of a window. Watch as the water evaporates and forms tiny droplets, then tap the bag to simulate rainfall! Ideal for classroom science lessons or at-home experiments, this eco-friendly kit brings the water cycle to life in a fun and engaging way.

Case Pack: 10

Ages 5+
