EN Lithium Battery Safety Cabinets - 90 Minutes C Series Chargeable

Lithium Ion Cabinets -

The 226-LTC Justrite EN Lithium Battery Cabinet features sockets for charging to protect personnel and property against the risks of storing, handling, and charging lithium-ion batteries while ensuring safety and compliance.

- Fire tests in compliance with the most stringent international standards, such as EN 14470-1
- Protects in-stored Lithium-ion batteries from overheating due to external fires for a period of at least 90 minutes
- 4 models, in 2 different sizes, include sockets to charge the batteries
- Panels with an internal melamine laminate face that are highly resistant to vapors, even strong ones
- On top and bottom of the cabinet are 90-minute certified automatic closing valves (70 °C) for the air inlet and outlet pipes.

- For safe and dedicated storage and charging of lithium LI-ion batteries.
