

MambaMAT™

Ergonomic and reliable ground protection: MambaMAT.

MambaMAT™

Ground Protection Matting - Medium Duty Ground Protection Matting

MambaMAT ground protection mats are meticulously designed for businesses in construction, landscaping, utilities, drilling, and arborist industries. With an ergonomic design, 8 hand holes, reliable traction, and a 95-ton load capacity, these mats offer unrivaled durability. Protect your property and make a smart investment with MambaMAT for long-lasting ground protection.

- Ergonomic orientation with 8 standard hand holes significantly improve the ease of handling, save time and enhance productivity.
- Designed to support weights of up to 95 tons.
- Reliable pedestrian traction minimizes the likelihood of slips, falls, and other work-related accidents, preventing potential injuries and subsequent legal liabilities for businesses.
- Flexible construction follows the contours of the ground, delivering a highly effective access solution on sloping or undulating ground conditions.
- Manufactured from 100% recycled high-density polyethylene,
- Durable and weather resistant.

- Outdoor
- For use as temporary roadways, pedestrian pathways, work areas for plant and machinery, drilling rigs, depot or storage areas.
- Medium duty
