

Dump bucket container made of ecologic high-density polyethylene. Great solutions for bulk industrial materials, waste, scrap transport and unloading. Capacity 1000 Kg.

- Structure made of high density ecologic polyethylene
- Watertight
- Equipped with an automatic unloading and tilting mechanism that is actionable by the operator staying seated within the forklift for safe unloading operations
- Forklift jackets and bucket support base made of sheet steel metal for high resistance
- Equipped with 2 fixed castors & 2 swivel with brakes
- Also available without tilting device to be used as a handy container on wheels
- Available for the food industry on customer's request

#### Recommended use

- Indoor/Outdoor
- For the safe handling and unloading of industrial materials, bulk materials and waste and for operational safety since the operator activates the dumping mechanism directly from the forklift seat.
- Heavy duty
