SIRET 351 812 698 00188 - RCS Annecy

CONFORMITY CERTIFICATE to the standards:

NF EN ISO 14122-3 : 2007

NF E85-015 : 2008

I. APPLICANT

Applicant: Monsieur ARGOUD

Company name: VERTIC - 691, Chemin des fontaines - CIDEX 8F - 38190 BERNIN - France

II. CONSIDERED EQUIPMENT

Trade mark: **VERTIC ALTILISSE**

Type of equipment: **Handrail**

Reference: **AL-A.EL straight and inclined self-supported versions**

III. REFERENTIAL

The straight and inclined self-supported versions of ALTILISSE handrail AL-A.EL, have been tested following the test methods described in the

8.2 paragraph of the NF EN ISO 14122-3 : 2007 and 7.3.3 paragraph of the NF E85-015 : 2008 standard.

IV. CONDITION FOR USE

- This handrail device should be installed against a 150 mm minimum height parapet and constituted by at least 4 sets reference AL-A.EL, a 36x2mm diameter top and middle rail (Ref. AL Lisse).
- The connections in the extremities of top and middle rails have to be arm-holed or fixed in any other way allowing a transmission of the efforts from an element to the other one. The top and middle rails are fixed on each upright by a M8x45 self-drilling screw.
- Maximum height from the ground to the top of the top rail : 1105 mm
- Maximum spacing between uprights : 1500 mm
- This device is considered as collective protective equipment against falls from a height

V. DESCRIPTION

A detailed description is provided in the « *ALTILISSE Garde corps autoportant* » technical package written the 17th of April 2014 by Adrien Cipriani, VERTIC Company.

VI. CONCLUSION

The ALTILISSE straight and inclined self-supported handrail reference AL-A.EL from the company VERTIC, successfully passed the static and dynamic tests. The device complies with the requirements of the NF EN ISO14122-3 : 2007 §8.2 and NF E085-015 : 2008 §7.3.3 standards.

Done in Chambéry, the 15th of May 2014
