

WST 700 VV Vario-Giraffe®
I stay relaxed with FLEX.

FLEX

**NOW
NEW!!!**

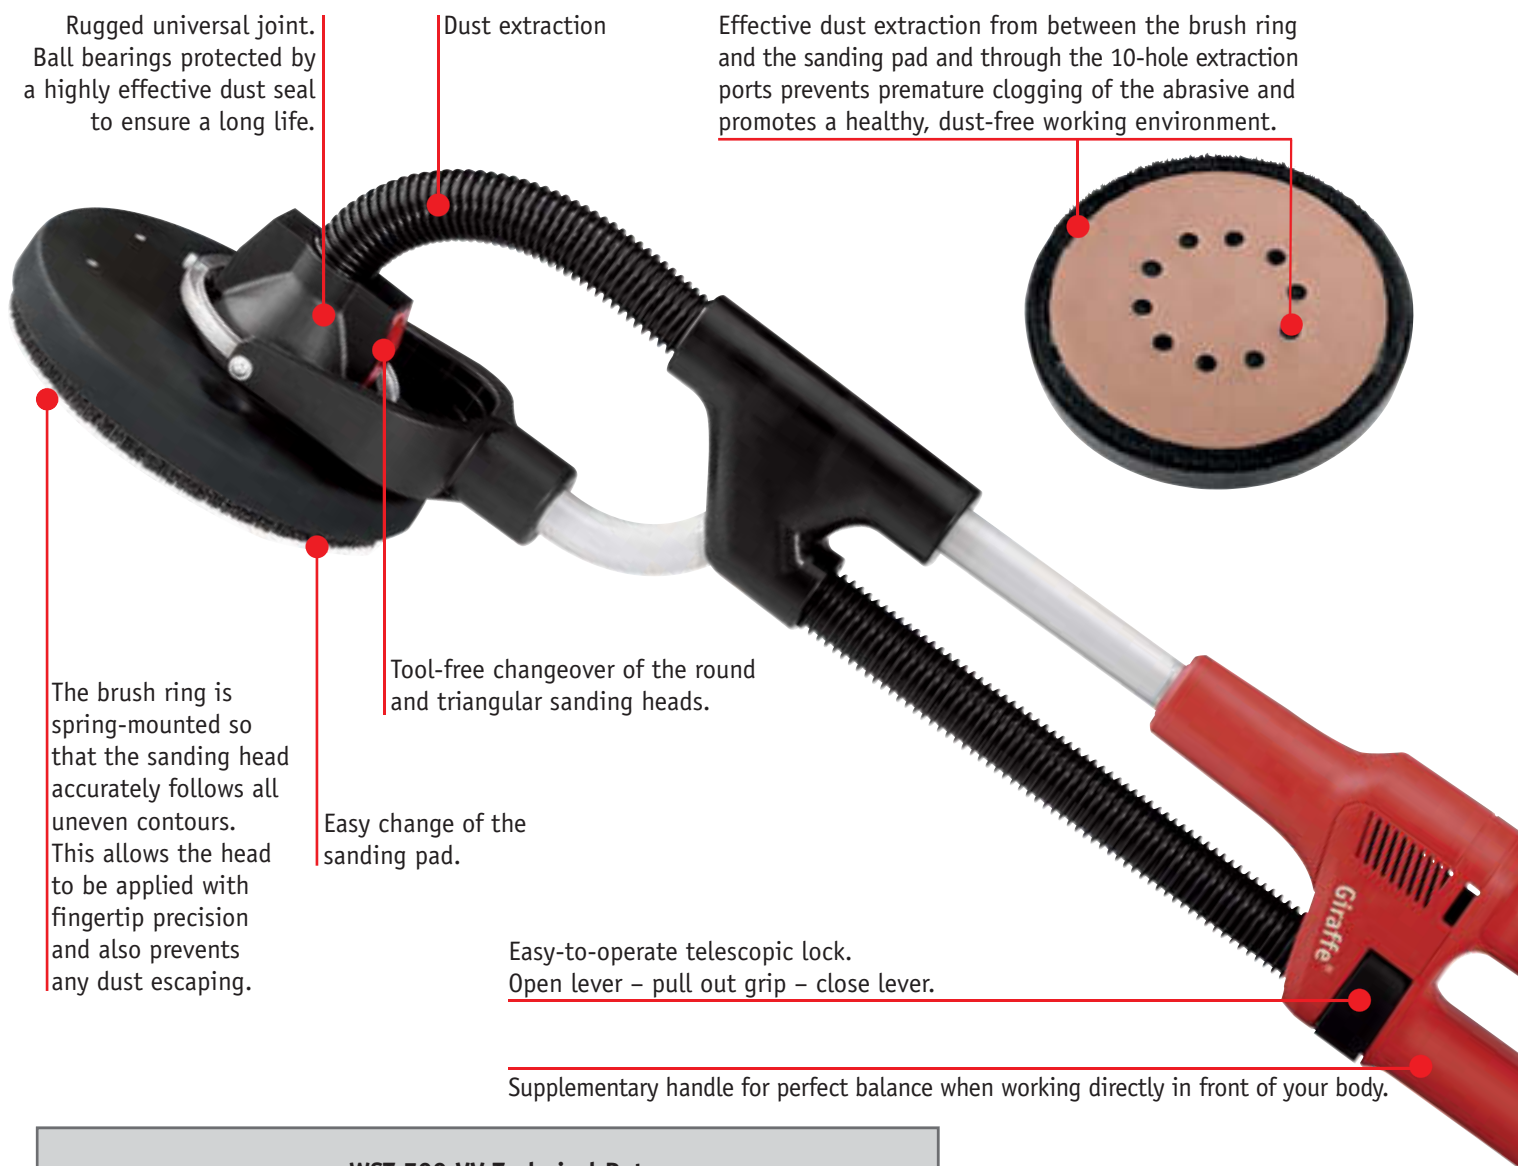

Sanding three-metre high ceilings and wall surfaces?

You used to need a ladder. Now, you simply use the FLEX WST 700 VV Vario-Giraffe®. It is a whole lot faster and, with its dust extraction, is much cleaner and, above all, gives a better finish.

Word has spread around the world about the extraordinary qualities of the FLEX Giraffe® long-neck sander. Whatever you use – sanding plaster boards or solid polystyrene insulation slabs or preparation ready for painting – the Giraffe® has become the indispensable problem solver for every painter and plasterer.

The new WST 700 VV Vario-Giraffe® leaves nothing to be desired. Convenient, user-friendly telescopic extension, interchangeable round and triangular sanding heads, wide range of hand grip positions to ensure optimum balance of the giraffe, combined with the outstanding performance and quality of FLEX.

Rugged universal joint. Ball bearings protected by a highly effective dust seal to ensure a long life.

Dust extraction

Effective dust extraction from between the brush ring and the sanding pad and through the 10-hole extraction ports prevents premature clogging of the abrasive and promotes a healthy, dust-free working environment.

The brush ring is spring-mounted so that the sanding head accurately follows all uneven contours. This allows the head to be applied with fingertip precision and also prevents any dust escaping.

Tool-free changeover of the round and triangular sanding heads.

Easy change of the sanding pad.

Easy-to-operate telescopic lock. Open lever – pull out grip – close lever.

Supplementary handle for perfect balance when working directly in front of your body.

WST 700 VV Technical Data

Power consumption	710 w
Power output	420 w
No-load speed	1000 – 1700 rpm
Detail sander no-load speed	3000 – 4500 rpm
Dimensions in mm	1330 – 1730
Weight	4.80 kg

Standard equipment for the WST 700 VV (Vario und Vario Plus)

Round sanding head	350.346
Triangular sanding head only Vario Plus	350.354
Hook and loop abrasive paper, Select, G 60	1 item from 348.503
Hook and loop abrasive paper, Select, G 80	1 item from 348.511
Hook and loop abrasive paper, Select, G 100	1 item from 348.538
Hook and loop abrasive paper, Select, G 220	1 item from 348.546
Hook and loop abrasive paper, Select triangle, G 60	1 item from 348.554
Hook and loop abrasive paper, Select triangle, G 80	1 item from 348.562
Hook and loop abrasive paper, Select triangle, G 100	1 item from 348.570
Hook and loop abrasive paper, Select triangle, G 220	1 item from 348.589
4m dust extractor hose, 32 mm diameter with locking connector	340.782
Carry case	1x

To ensure optimal balance, the Vario-Giraffe® provides numerous additional grip positions with the ergonomic handle.

Connection for extractor hose. A 4 m length of 32 mm diameter snap-fit extractor hose is included in the basic package.

Adjustable locking screw for telescopic extension.

A quick action unlocks the telescopic handle lock. The grip can now be set to the required length.

The ergonomically-shaped T-handle provides additional hold when sanding ceiling.

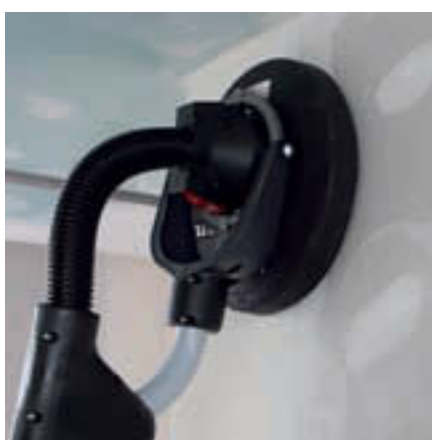

Fits perfectly. Simple swivelling connection for the extractor hose.

Powerful 710 w motor.

Dust and impact-protected On/Off switch.

Variable speed control ensures optimum speed setting for sanding different types of surface.

The universal-joint mounting of the sander head allows it to adapt to any inclination and angle.

The sander heads can be locked and released with a quick click.

When resting the Vario-Giraffe® the extended T grip protects the vacuum hose from kinking.

Handle rotates through 360°, with telescopic extension from 1330 mm to 1730 mm.

An all-round success.

However you hold the Vario-Giraffe®, you will always find the ideal grip position for comfortable, fatigue-free working. The uniform weight distribution and centrally positioned motor ensure that the Vario-Giraffe® is always optimally balanced. This minimizes top-heaviness when sanding, significantly easing the strain on the operator. The ergonomic design and numerous grip possibilities ensure that you always grip the Giraffe® at the best positions for you.

The round head is ideally suited for fast and effective sanding of large areas with a high material removal rate. Comes standard with a soft sanding pad, that prevents grooving and scratching.

Our dust extractor system ensures a virtually dust-free working environment. And with the matching FLEX abrasives, the range of applications is practically unlimited.

The Vario model (350.311) includes vacuum hose, round sanding head and carry case.

Round sander head 350.346

Optimally suitable for finishing large surfaces on walls and ceilings. Effective dust extraction, high surface removal rate.

225 mm diameter sanding pad, round 350.362

Hard sanding pad for hard plaster or filler compounds in drywall construction, with hook and loop abrasive fastening system.

Soft sanding pad Ø 225, round, 352.306

Soft sanding pad for sanding soft filler, with hook and loop system for attaching abrasives.

Quick and easy adjustment of the telescopic handle enables you to reach all heights in one process.

Whether working overhead or down to ground level, you can always find an optimum grip position. The motor always stays between the grip positions and so is perfectly balanced.

The ergonomic design ensures that every user finds the most comfortable grip position for fatigue-free working.

It provides the ideal solution for anyone aiming to achieve an absolutely convincing result. The easy sanding head exchange saves time and money.

The Vario-Plus model (350.338) includes vacuum hose, round and triangular sanding heads and a rugged carry case.

Right into the tightest corner.

The innovative triangular sanding head perfects work procedures. Hand finishing or finishing with a hand-operated random-orbit sander is a thing of the past. The sander head is changed in a jiffy, allowing immediate finishing of corners and edges.

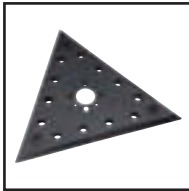

The orbital movement of the sanding pad right up to the edge of the sanding head guarantees seamless sanding of corners and edges. The 360° rotating sanding head allows the Vario-Giraffe® to be smoothly guided round corners without any reduction of the well-known dust extraction performance. With the FLEX S 36, S 47 and S 47 M industrial vacuum cleaners, we offer you the optimum complement for healthy, dust-free working.

And in the FLEX accessories range, you will naturally also find the right abrasive.

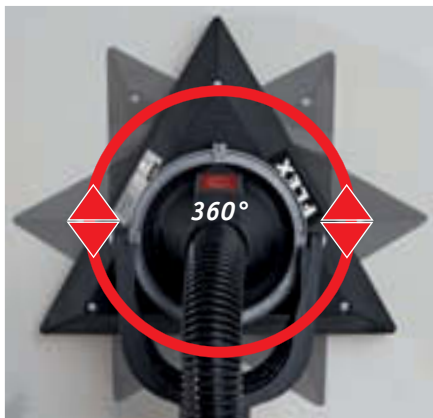

Triangular sanding head 350.354

Ideally suited for sanding edges and corners. The random-orbit movement of the sanding pad guides the abrasive right up to the edge.

Triangular sanding pad, 354.988

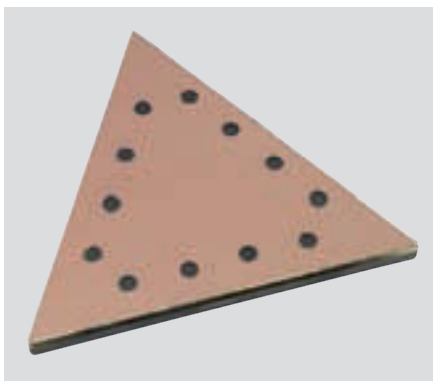

Sanding pad for plaster or hard filler compounds in drywall construction, with hook and loop system for attaching abrasives.

The triangular sanding head rotates through 360°, allowing seamless sanding in all positions – including in corners and angles. It also ensures optimum utilization of the full area of the abrasive sheet.

The orbital movement of the sanding pad ensures that the abrasive is guided right to the edge of the workpiece.

Effective dust extraction through a 12-hole extraction system.

The tool-free head-exchange function allows the triangular sanding head to be used and immediately followed up with the finish to the corners and edges.

The innovative interchangeable triangular sanding head allows seamless sanding of corners and edges – accurately and effortlessly. This dispenses with the need for subsequent manual finish-sanding.

The Vario-Giraffe® WST 700 VV Plus is always at home, even in the tightest corners and angles, impressively producing perfect results, every time.

Everything in its place.

To be able to carry out its work thoroughly and effectively, the Vario-Giraffe® needs strong partners: an efficient, rugged industrial vacuum cleaner – such as the FLEX S 47 or S 47 M – and the right abrasives. Only the optimum combination of sander, dust collector and abrasive accessories allows the user to obtain the maximum from the Vario-Giraffe®.

The unique storage system has been specially developed for the WST 700 VV Vario-Giraffe® and the MS 1706 FR wall chaser.

The new storage system clips to the vacuum cleaner with a with a quick hand movement.

Storage system for S 47, S 47 M.

Simply place the Giraffe® on the rest and then you can conveniently change the abrasive or sanding head.

Sanders, scouring grinders and wall chasers must be operated only when connected to a dust class M-rated industrial vacuum cleaner. For Example the Flex S47 M. The highly effective fine filter system protects the user from health-harmful dusts, the machine from abrasive particles and the tools from premature wear.

Scouring-Giraffe® WST 1000 FV

Smooth walls and ceilings without bending or climbing – cosmetic work on concrete surfaces from a safe standing position is the strength of the WST 1000 FV Scouring-Giraffe®. As with the Vario-Giraffe®, the user can effortlessly reach hard-to-access places in high rooms without a ladder or scaffolding.

Diamond grinding disc 125 mm diameter x 28 mm bore

Turbo grinding disc, extremely quiet running with optimal material removal. More diamond grinding cups are listed in the comprehensive 2009 FLEX catalogue or at www.flex-tools.com

Disc bore	28 mm diameter
Dimensions in mm	1330 – 1730
Weight	5.5 kg

The WST 1000 FV Scouring-Giraffe® allows you to work without a ladder or scaffolding.

The WST 1000 FV effortlessly removes protruding butt joints and concrete lips. The integrated dust extractor, combined with our S 36, S 47 and S 47 M industrial vacuum cleaners ensures a clean work place and healthy environment.

We know all about sanding and grinding.

A telescopic long neck sander for walls and ceilings. Who could have come up with this idea, other than the inventor of the high-speed angle grinder, the inventor of "FLEXING"? That was more than 50 years ago, and today FLEX is still setting standards in angle grinders.

*Synonymous with performance:
the high-speed angle grinder – a FLEX invention*

At its base in Steinheim near Stuttgart, FLEX has been well known for more than 85 years as a manufacturer of high-quality electrical power tools. One of our secrets of success is that we align ourselves closely with the requirements of the craftsman. From this approach, we create products that are legendary in many industries for their long life, performance and high utility value. And the Vario-Giraffe® would not be a FLEX, if it didn't have precisely these properties. You can find out more about it at www.flex-tools.com
