Starke Arvid Panel Lifter

Aids your plasterboard installation

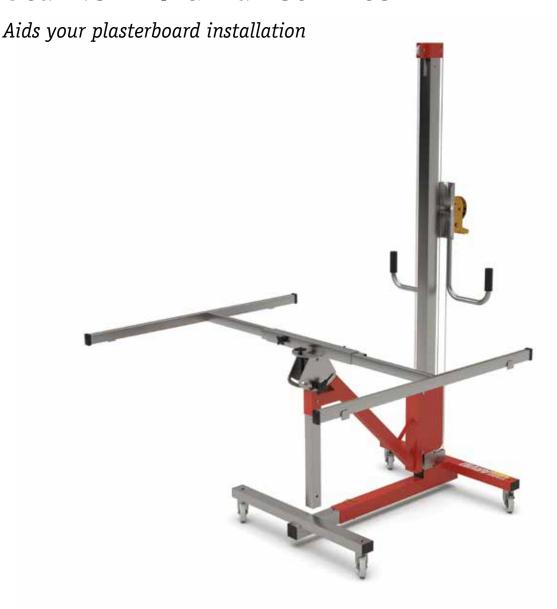

Many regard high wall and ceiling installation as an unavoidable pain in the neck – with the emphasis on pain. Anybody who has tried to lift plasterboard above shoulder height would agree that it is ergonomically unsound. But it is avoidable. Our Panel Lifter aids you in your plasterboard installation and helps you to avoid strain injuries.

It simply holds the boards up for you to erect easily, safely and efficiently. All you need to do is secure them. Naturally, the lifter can be used at lower levels as well. The lowest level of the lifter comes flush with our Trestles and Transit Benches. Just shift the board over to the lifter and raise it to the required height.

Product Features

Our Panel Lifter is all you require to carry out ceiling, sloping ceiling and high wall installations. The horizontal and vertical swivel yoke attachment has an adjustable path of 180°, making it easy to choose the right angle. The lifter is a rugged steel and tubular construction with galvanised sections. Easily dismantled to take up minimum space when transporting.

- **Reduces the load on the body when installing plasterboard above shoulder height**
- **Designed to interact with our Trestles and Transit Benches**
- **Variably adjustable yoke attachment through 180°**
- **Easily dismantled for transportation**

Create a workplace with clean floors for safer installation and optimal ergonomics and efficiency.

Well thought-out flows with good ergonomics and maximum efficiency.

Our panel lifter eliminates risky and cumbersome high height plasterboard installations.

Technical Specifications

Product Number	23000
SRA code	756325
Load capacity	100 kg
Width	810 mm
Length	810 mm
Height	2040 mm
Lifting height, low position	850–3600 mm
Lifting height, high position	1950–4950 mm
Weight	54 kg

*Detailed Technical Specifications and Directions for Use are available at **www.starkearvid.se** – Phone: **+46 (0)522-22 000***

Can be dismantled into three parts

The manual winch raises the board steplessly, leaving your hands free to erect the board in place

Ergonomic handle for safer transport and minimum crush risk

The lifter's underframe can be extended to suit the load and erection site

Two of the four swivel castors are lockable for maximum stability when erecting
