

CE - DECLARATION OF CONFORMITY

Manufacturer: Amgas Industrigassystem AB
Industrial gassystem & Infra-red Technology

Customer: Ramirent AB

Customer order number:

Amgas Hereby declare that: Removable LPG Vaporizer central, Capacity 32kg/h
Including safety devices
Regulator and connections.
ATTENTION: Only for outside installations

Part Number: 93436:ET8T032-2176/2195

Has been produced – where relevant – according to the following directives and standards:

EN 746 Part 2

- Council Directive relating to Appliances burning gaseous fuels, 90/396/EEC
- Council Directive relating to Machinery, 89/392/ECC
- Council Directive relating to Electro Magnetic Capability, 89/336/EEC
- Council Directive relating to Low Voltage, 73/23/ECC

It is to be noted, that as harmonized standards for all built components are not yet available, only the ones which are CE-marked and have an ECC Approval.

The other components are at the time of production constructed in a way which enables them to meet any preliminary standards, with which the constructor is familiar at the time.

Please note that the gas train has been leak tested with air after assembly of the built in components and welded pipes have been pressure tested with water before assembly with the other parts.

Adjusting and leak test after final mounting are not a part of our delivery.

Note: The installation, into which our components are built, must not be put into operation until the final installation has been declared in conformity with the directive relevant to the installation.
