ATTACHMENTS

The power of unrivalled versatility.

Building with confidence.

Attachments make a single machine into many!

The vast range of unique Merlo attachments gives rise to a new meaning of versatility for telescopic handlers. For all models of Panoramic, Roto, Turbofarmer or Multifarmer there are countless innovative working tools which maximise their potential, enhance versatility, and optimise their use in any application sector, from construction to agriculture, waste recycling to industry.

Merlo telescopic handlers, fitted with these attachments, offer efficiency, profitability and significant cost saving in many applications otherwise requiring a variety of specific machines.

The features and performance of Merlo attachments, together with their total compatibility with the machines, result from an integrated in house design and manufacturing process.

The heart of the system is the Merlo carriage, which mates the huge variety of attachments with the telescopic boom of the machine. All Merlo attachments are easily fitted to the carriage with an exclusive 'Tac-Lock' quick coupling system – much more 'use-friendly' than conventional manual coupling system. It takes just a few seconds to connect the attachment, almost instantly adapting the base machine to changing lifting, digging, transport, loading/unloading, and precision handling needs. This brochure illustrates the many uses added by fitting attachments, some of them specifically designed for the individual application, from all over the world.

Warning: National Regulations Operator Training requirements and Certification can differ and some attachments shown may not be available in every country. Attachments may require pre-arrangement of the host machine and, in some cases, there is not a retro fit option. Always check with your Merlo dealer!

Forks

Manure fork and grab

Merlo Group the supremacy of ideas.

Telescopic boom. Powder painting.

The Merlo brand is synonymous for innovation and technology in the world of telescopic handlers.

The history of the Merlo Group is punctuated with ideas, drive and passion. The whole Group revolves around these values, providing the base for the success of new products, as well as of the numerous international awards the company has been awarded.

Developing complex projects, from ideas to results and from design to sales, implies proposing innovative solutions which become the forerunners of new trends and applications in the most competitive markets.

This is a winning attitude which is seen in the drive for an integrated manufacturing process with the most modern construction methods, automatic processes, integrated electronics, robotics handling and much, much more.

Our will to maintain a closer and closer bond with our customers is reflected in training and refresher courses, in after-sales service, and in trust-based relationships with our dealers worldwide.

The results are compact and manoeuvrable machines which ensure unrivalled levels of comfort, efficiency and safety.

This is the strength of the Merlo Group.

Building with confidence.
