

# The biggest electric wheeled dumper. For urban construction sites.

Payload up to  
**3.5 t**

**100 %**  
emission free

With a payload of up to 3.5 tonnes, the C804e is currently the world's biggest electric wheeled dumper.

The unique vehicle concept with low entry point, and swivel and support seating provides ergonomic comfort and maximum safety.

Compact dimensions, full height under 2 m – easy access to underground parking

Swivel seat for the best overview and improved safety – useful on busy downtown sites

Optionally available with round bucket or flatbed (with quick change system) – payload of up to 3.5 tonnes

Hugely agile thanks to the all-wheel steering – ideal for efficient working on narrow construction sites

State-of-the-art lithium iron phosphate batteries (LiFe): long-lasting, maintenance-free, extremely safe, light, highly efficient charging and discharging

Fully emission-free and low-noise – can be used to work in minimum disruption areas e.g. hospitals, retirement homes, etc.

Innovative battery management system developed by Bergmann; charge with residential power supply (230 V) or at quick charging stations

Electric all-wheel drive with automotive steering: for speeds up to a maximum of 14.3 mph (23 km/h)

Can be operated on a class B driving license

Suitable for off-road use thanks to the all-wheel drive and central swivel joint

The best tire tread for every surface – be it road, grass, construction site or off-road

## The Bergmann C804e

Length	3,950 mm	12.96 ft
Width	1,486 mm	4.88 ft
Height	1,996 mm	6.55 ft
Ground clearance	260 mm	0.85 ft
Tare weight	2,550 kg	5,622 lb
Payload (techn.)	3,000–3,500 kg	6,614–7,716 lb
