PART OF THE EXFO FTB Ecosystem

The FTB-200 delivers the best performance on the market for optical, Ethernet and multiservice testing.

FTB-200 Compact Platform

THE INTELLIGENT PLATFORM BUILT FOR THE SUPERTECH

Connects anywhere: USB, 3G, Wi-Fi, VPN and Bluetooth

Loaded with utilities: all the tools required to maximize field testing, plus third-party applications

Like a PC: Intel processor with Windows Embedded Standard operating system

EXFO Connect-compatible: automated asset management; data goes through the cloud and into a dynamic database

GPS capabilities: accurate coordinates under the same conditions as a regular satellite GPS receiver

COMPLEMENTARY PRODUCT

PEC SHEET

THE POWER YOU NEED, NO MATTER THE APPLICATION

The FTB-200 delivers the processing power of a high-end platform for a variety of advanced applications—all in a conveniently sized go-anywhere field-testing tool.

CWDM Turn-Up Testing

Integrate two metro/CWDM OTDRs to test through CWDM-based mux/demux at ITU-recommended wavelengths.

40G and ROADM Commissioning

House an OSA into a compact portable solution for fast and accurate DWDM commissioning and high-speed networking-up to 40 Ghit/s

Multiservice Testing

Simultaneously run a 10 gigabit next-generation SONET/SDH analyzer, as well as 1 gigabit and 10 gigabit Ethernet analyzers, delivering IPTV test capabilities and TCP throughput assessment.

Fiber Characterization and Construction

Combine connector inspection, OLTS, OTDR, PMD and CD testing in a single solution, or incorporate an OTDR with a multitest module, for in-depth link characterization.

Business Service Activation

Join an FTTx PON/MDU OTDR featuring a dynamic range of up to 39 dB with a 1/10 gigabit Ethernet testing module, to simplify and speed up the deployment of Ethernet services.

Carrier Ethernet Testing from 10 Mbit/s to 10 Gbit/s

Benefit from a comprehensive suite of Ethernet testing capabilities, including EtherSAM (ITU-T Y.1564), for turning up and troubleshooting mobile backhaul, commercial and wholesale services.

ONE PLATFORM, OVER 30 MODULES

Optimized for all phases of the network lifecycle, the FTB-200 houses any of EXFO's FTB one- or two-slot modules to meet your evolving needs. Configure your platform by combining optical, transport and datacom modules to cover a wide range of applications. Offering power, speed and modularity in a compact format, the FTB-200 is the perfect tool for the field.

Optical Test Modules

Discover the industry's most renowned line of OTDRs, the most advanced dispersion analyzers and optical spectrum analyzers.

| OPTICAL TEST MODULES | |
|----------------------------------|--------------------------|
| OTDR | FTB-7xxx (D-E Series) |
| MultiTest Module | FTB-3930 |
| Optical Spectrum Analyzers | FTB-5240S FTB-5240S-P |
| Single-Ended Dispersion Analyzer | FTB-5700 |

Transport and Datacom Test Modules

Choose from the most compact and powerful SONET/SDH, OTN, Fibre Channel and Ethernet analyzers—the new standards in next-generation network testing.

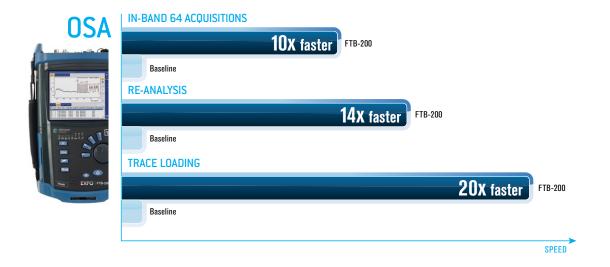

| TRANSPORT AND DATACOM TEST MODULES | |
|--|----------------------------------|
| DSn/PDH and SONET/SDH Electrical Test Module | FTB-8105 Transport Blazer |
| SONET/SDH Test Module | FTB-8115 Transport Blazer |
| Next-Generation SONET/SDH Test Modules | FTB-8120/8130 Transport Blazer |
| Multiservice Test Modules | FTB-8120NGE/8130NGE Power Blazer |
| Ethernet Test Modules | FTB-8510B Packet Blazer |
| 10 Gigabit Ethernet Test Module | FTB-8510G Packet Blazer |
| Fibre Channel and Ethernet Test Modules | FTB-8525/8535 Packet Blazer |

DELIVERING UNIQUE PERFORMANCE

Providing the same compatibility as its predecessor, the FTB-200 platform now leverages a powerful Intel ATOM processor to deliver unmatched speed and performance for the most demanding test applications.

FIBER CONNECTOR INSPECTION AND CERTIFICATION - THE ESSENTIAL FIRST STEP

Taking the time to properly inspect a fiber-optic cable can prevent a slew of problems down the line-saving you time, money and headaches.

FIP-430B | The First Fully Automated Fiber Inspection Probe for the Field

Housing a unique automatic focus adjustment system, the FIP-430B automates each operation in the connector endface inspection sequence, transforming this critical process into one quick and easy step, which can be performed by technicians of all skill levels.

100% Automated a 1-step process a shorter test time b

3 Models to fit your budget:

| FEATURES | | | |
|--|-------------------|-------------------------|-----------------------------|
| | Basic FIP-410B | Semi-Automated FIP-420B | Fully-Automated FIP-430B |
| Three magnification levels | √ | √ | √ |
| Image capture | √ | √ | √ |
| Five-megapixel CMOS capturing device | √ | √ | √ |
| Automatic fiber image-centering function | X | √ | √ |
| Automatic focus function | X | X | √ |
| On-board pass/fail analysis | X | √ | √ |
| Pass/fail LED indicator | X | √ | √ |

Read the FIP-400B specification sheet or visit www.EXFO.com/keepthefocus for more information.

Notes

- a. Model FIP-430B only
- b. Data sourced from EXFO's case study, with calculation based on typical analysis time.

SOFTWARE TEST TOOLS

EXpert TEST TOOLS

EXpert VoIP generates a voice-over-IP call directly from the test platform to validate performance during service turn-up and troubleshooting.

- > Supports a wide range of signaling protocols, including SIP, SCCP, H.248/Megaco and H.323
- > Supports MOS and R-factor quality metrics
- > Simplifies testing with configurable pass/fail thresholds and RTP metrics

EXpert IP integrates six commonly used datacom test tools into one platform-based application to ensure that field technicians are prepared for a wide range of testing needs.

- > Rapidly performs debugging sequences with VLAN scan and LAN discovery
- > Validates end-to-end ping and traceroute
- > Verifies FTP performance and HTTP availability

This powerful IPTV quality assessment solution enables set-top-box emulation and passive monitoring of IPTV streams, allowing quick and easy pass/fail verification of IPTV installations.

- > Real-time video preview
- > Analyzes up to 10 video streams
- > Comprehensive QoS and QoE metrics including MOS score

SOFTWARE APPLICATIONS

Providing lightning-fast results in the first step of fiber-link testing, ConnectorMax2 is a powerful, platform-based, automated inspection application; it delivers quick pass/fail assessment of connector endfaces and is specifically designed to save both time and money in the field.

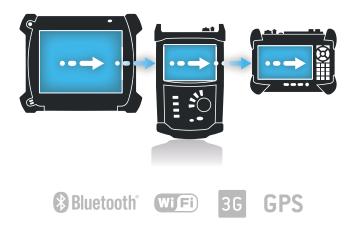

| THIRD-PARTY TEST TOOLS | |
|------------------------|--|
| Wireshark | This live-network packet-capture utility makes it possible to look "inside" the packets and obtain data such as transmission time, source, destination, protocol type, etc. Users can then diagnose a problem or root out suspicious behavior. Wireshark is a standard utility on all FTB-200 platforms. |
| JPerf | This TCP performance testing tool can create TCP and UDP data streams, which measure the throughput of a network that is carrying them. Thanks to various user-definable parameters, technicians can rely on JPerf to optimize or tune a network under test. |
| Network Stumbler | Network Stumbler verifies wireless network configurations, enabling field technicians to identify areas that have poor coverage or wireless interference, and helping them to aim antennas for full effect and find unauthorized access points. |

| SOFTWARE UTILITIES | |
|-----------------------------|--|
| Update Manager | Ensure that your entire fleet of platforms is up-to-date with the latest software, and easily manage your maintenance contracts. |
| VNC configuration | The Virtual Network Computing utility allows technicians to easily communicate settings to remote colleagues. |
| Microsoft Internet Explorer | Access the Web directly from your platform interface. |
| Bluetooth file-sharing | Share files from your FTB-200 to any Bluetooth-enabled device. |
| Wi-Fi connection | Display available Wi-Fi connections and save your default settings. |

CONNECTED ANYWHERE, ANYTIME

The value of connectivity resides in the ability to connect your platform anywhere, at any time. That's why we have equipped our platforms with the technology to be as flexible as possible. Whether to transfer data to the cloud, to a device or to acquire a platform's location via GPS, you have what it takes.

Secure VPN communications

We have brought VPN capabilities to our platforms to provide a secured connection for those who need it. And, we cover 99% of the world's VPN connection types, thanks to Cisco, Juniper and Checkpoints* technologies. Secure communications are now within your reach.^{a,b}

3G mobility

Our 3G universal USB angle is ready to house most service provider SIM cards. In fact, it is compatible with over 80% of the worldwide 3G coverage offered by all the main 3G service providers using unlocked SIM cards.^{b,c}

Remote control

Use remote assistance to troubleshoot units in the field, trigger tests remotely or help a technician with a problem. Working without it is hard to imagine.

Instant messaging

Since our platforms are Windows-based, they are just like a PC. You can install chat tools to quickly communicate with your team.

Notes

- a. Please refer to the User Guide to learn how to set up your VPN connection, as required by your IT department.
- b. Current FTB platform must be updated to the latest version supporting these options
- c. Please refer to the User Guide when installing this device on your compatible FTB platform.

EXFO Connect

EXFO CONNECT MAKES YOUR DATA MEAN BUSINESS

EXFO Connect lets you store and push equipment and test data automatically to our cloud-based servers, allowing you to streamline test operations, from build-out to maintenance.

Centralize and automate inventory management to provide global visibility

Test Equipment Manager, a component of EXFO Connect, deals with the constant demands of software updates, keeping track of the equipment and ensuring that field technicians involved in network construction, maintenance or troubleshooting are properly equipped. The best part? It's all automated.

Store and consolidate test data across the entire company

Test Data Manager, another component of EXFO Connect, allows managers to make the most of their test investment. It extracts the full value out of the generated test data to help you optimize network efficiency, all through a highly automated, secure and centralized environment.

Create and customize reports from collected data

EXFO Connect tracks and updates your test gear, giving you fingertip access to all the data and allowing for quick correlation and tailored reporting for any member of the organization.

UPDATE MANAGER

Stay current with the FTB-1 Update Manager, which enables you to easily manage the applications developed for your test solution. Thanks to EXFO's feature enhancement program, it has never been easier to benefit from our latest innovation. Based on customer feedback, acute market trend analysis and compliance with the latest standards, EXFO is committed to ensuring that your product is at its best.

DESIGNED FOR EFFICIENCY

1 LED indicators
2 Switch application and keyboard
3 Knob
4 Power meter and VFL
5 Battery
6 Stylus
7 Two slots to house modules
8 USB 2.0 port
9 1 GigE port
