

Mobiheat MH40.2Q1 8/16/40kW 400V electric water heater

Our electronically controlled water heaters provide a stable and reliable heat supply to heating systems.

The heaters are fitted with wheels and handles, which makes them easy to move and transport.

A clear and easily accessible control panel provides access to all control functions. The flow and return valves have integrated thermometers for direct reading of water temperature.

The water heaters have their own programs for drying concrete floors.

Current applications:

Supply of hot water to existing water-based underfloor heating during construction or renovation

Hot water supply for freestanding fan heaters

Supply of hot water to radiator systems during construction or renovation

Drying of concrete pavement

The water temperature can be adjusted in the range of 20°C to 80°C. When using the drying program, the temperature is limited to a maximum of 50°C.

The heating power is adapted to the power connection used on the device.

Security features:

Frost protection

Safety valve

Expansion tank

Overtemperature protection

Ground fault circuit interrupter

Storlek

Width 600 mm

Depth: 580mm

Height: 1220mm

Weight: 58 kg

Circulation pump: max. 3.0 m³/h, max. 5.5 mWS

Volume: 10 liter

Recommended pressure 1.5 – 2.0 bar

(safety valve = 3.0 bar)

IP klass IP 44
