

THERMOBILE

General

mobile and stationary
climate solutions

For over 50 years, Thermobile Industries BV has specialized itself in the development, production and international sales and marketing of, both mobile and stationary, space heaters. We offer advice, efficient delivery and worldwide service to our customers. Our solution-oriented way of thinking and manufacturing of custom-tailored designs, have resulted in a large portfolio that is continuously being updated with the latest technologies.

Thermobile distinguishes itself through quality, reliability and sustainability of its products. We always try to offer additional value to our customers and support for all heat requests.

Our products are manufactured with great care and they are extensively tested. A permanent quality control system, according to ISO 9001: 2015 is integrated in the production process.

All Thermobile heaters comply with the most stringent European standards. All models carry the mandatory CE marking and are also in accordance with the EAC standard certification.

Diesel/Heating oil

Propane

Wood pellets

Electricity

Kerosine

Natural gas

Bio oil

TA | Direct oil fired

TA-80

FEATURES

- Equipped with a high pressure pump for diesel or paraffin with a 1-way pipe system. (Conversion to a 2-way pipe system for connection with separate fuel tank available as an option)
- All models are equipped with burner relay, photocell flame control and thermostat connection.

ADVANTAGES

- 100% clean and dry heat without any loss of efficiency (direct fired).
- Large fuel tank for at least 16 hours of operation.
- High outlet temperature of 450°C approximately.
- Durable phosphated body panels with powder coating.
- Because of the double walled construction, the surface of the heater will remain at ambient temperature during operation.

APPLICATIONS

- Heating of storage facilities and work places.
- Defrosting of pipes and installations.
- Keeping construction sites free from frost.
- Heating of greenhouses and polytunnels (only use paraffin and control CO₂ and CO emission).
- Drying of agricultural produce.

WORKING PRINCIPLE

Direct diesel fired heater
(Attention: this product requires area ventilation at all times).

TCA | Direct oil fired

TCA-50

FEATURES

- Oil tank level meter and pressure gauge delivered as a standard.
- With built-in thermostat and digital temperature display.
- Supplied with air tyres.
- Direct fired heater.

ADVANTAGES

- Quick increase of temperature.
- Very mobile and reliable functioning.
- 100% efficiency.

APPLICATIONS

- Heating of storage facilities and keeping installations free from frost.
- Local heating in porc- and poultryhouses.
- Heating of polytunnels and greenhouses.
- Heating of sheds and storages.
- Drying of agricultural produce.

WORKING PRINCIPLE

Diesel fired direct heater

(Attention: this product requires area ventilation at all times)

TECHNICAL SPECIFICATIONS

ITA | Oil fired with flue connection

ITA-45 ROBUST

FEATURES

- Equipped with a high pressure pump for diesel or paraffin with a 1-way pipe system (conversion to a 2-way pipe system for connection with separate fuel tank available).
- Outlet temperature with ΔT of about 50°C.
- High efficiency heat exchanger (91% Min).
- The ITA Robust version is supplied with a very robust bumper, large ball bearing wheels, forklift slots and tank heating.

ADVANTAGES

- Durable phosphated body panels with powder coating.
- Maintenance friendly and easy to install and operate.
- Large fuel tank for at least 16 hours of operation.
- Air hoses can be mounted in order to supply heat to specific areas.

APPLICATIONS

- Storage of flower bulbs without risk of harmful ethylene emission.
- Heating of greenhouses and polytunnels without risk of harmful CO₂ and CO emission.
- Heating of construction sites, tents, showrooms halls, warehouses and workshops.
- Drying of agricultural produce, construction - and renovation projects.

WORKING PRINCIPLE

Indirect diesel fired heater that produces 100%, clean and dry, warm air by blowing air alongside a heat exchanger with a powerful axial fan.

ITA-35R | Oil fired with flue connection

ITA-35R

FEATURES

- High efficiency heat exchanger (91% Min).
- Outlet temperature with ΔT of about 50°C.
- Out of the box with flue pipe, roomthermostat with 10m cable and a jerrycan connection.
- Equipped with a high pressure pump for diesel or paraffin with a 2-way pipe system.
- Equipped with "ventilation-only" setting.

ADVANTAGES

- Durable phosphated body panels with powder coating.
- Maintenance friendly and easy to install and operate.
- Air hoses can be mounted in order to supply heat to specific areas.

APPLICATIONS

Heating of tents, emergency shelters, field hospitals.

WORKING PRINCIPLE

Indirect diesel fired heater that produces 100%, clean and dry, warm air by blowing air alongside a heat exchanger with a powerful axial fan.

IMA | Indirect oil fired with separate external burner

IMA-111 RADIAL

FEATURES

- Fully automatic burner control with thermostat connection.
- The combustion chamber is heat resistant up to 850°C.
- Equipped with overheat protection and temperature limitation of warm air.
- Supplied with Intercal industrial burner with flow control. Alternative burners available (Riello oil- or gas burner for instance).
- Outlet temperature ΔT of about 47°C.
- The EC fan is equipped with built-in soft starter and phase control as a standard.
- High efficiency heat exchanger (92% Min).

ADVANTAGES

- Maintenance friendly, easy to install and operate.
- Economic thanks to the high efficiency heat exchanger and the possibility of recirculation.
- Can be easily transported.

APPLICATIONS

- Storage of flower bulbs without risk of harmful ethylene emission.
- Heating of greenhouses and polytunnels without risk of harmful CO₂ and CO emission.
- Heating of construction sites, tents, showrooms halls, warehouses and workshops.
- Drying of agricultural produce, construction - and renovation projects.

WORKING PRINCIPLE

Indirect diesel fired heater that produces 100%, clean and dry, warm air by blowing air alongside a heat exchanger with a powerful radial fan.

IMAC | Oil fired with flue connection containerized

IMAC-4000

FEATURES

- Equipped with overheat protection, phase control and temperature limitation of warm air.
- Units with EC ventilator and IMAC-4000 are equipped with soft starter.
- Automatic burner control with thermostat connection.
- Supplied with Intercal industrial burner with flow control. Alternative burner available (Riello oil- or gas burner for instance).
- High efficiency heat exchanger (92% Min).
- Outlet temperature ΔT of about 47°C.
- Stainless steel bodywork.

ADVANTAGES

- Easily transportable with box girders and forklift slots.
- Protection against non-professional operation because of the lockable central control box and burner area.
- Maintenance friendly, easy to install and to operate.
- Economic thanks to the high efficiency heat exchanger and the possibility of recirculation.
- Logistic and storage advantages because of its very robust stackable construction.

APPLICATIONS

- Storage of flower bulbs without risk of harmful ethylene emission.
- Heating of greenhouses and polytunnels without risk of harmful CO₂ and CO emission.
- Heating of construction sites, tents, showrooms halls, warehouses and workshops.
- Drying of agricultural produce, construction - and renovation projects.

WORKING PRINCIPLE

BOILER | High capacity boiler (500kW)

FEATURES

- 655 litre watertank for stable operation.
- Able to accept different fuel types (Diesel, HVO and GTL).
- Built on a sturdy galvanised frame and protected by a robust construction.
- Small footprint of 4.5m²

ADVANTAGES

- Easily transportable with box girders and forklift slots.
- Compact boiler with a large watertank to improve efficiency.
- Easy to operate and service.
- Optional input for extra operation programs.

APPLICATIONS

- Targeted heating at construction sites and events.
- Temporary heating through existing heating systems.

WORKING PRINCIPLE

Indirect diesel fired heater that heats up water contained within the boiler.

TECHNICAL SPECIFICATIONS

CABINET HEATER | Stationary air heater

CABINET HEATER-65

CABINET HEATER-110

FEATURES

- Fully automatic control with thermostat connection.
- As standard equipped with:
 - Intercal oil burner.
 Alternative burners available e.g. (natural) gas burner, low NOx burner.
- Equipped with overheating protection and temperature limiter.
- High efficiency (92%) heat exchanger.
- Easy to clean inspection glass.
- Height-adjustable legs.
- Dust filters in the air intake panels.
- Discharge nozzles adjustable in direction.

ADVANTAGES

- Durable construction with the use of phosphated sheet steel with a powder coating.
- The heater delivers 100% clean, dry heat.
- Low fuel consumption thanks to the use of a high-efficiency heat exchanger that raises the temperature of the intake air by 35°C.
- The use of air filters and insulation in the discharge nozzles keeps the noise production well within standards.

APPLICATIONS

- Heating of workshops with very high efficiency and good heat distribution.
- Heating of stables, greenhouses and polytunnels without the risk of generating harmful CO₂ and CO emissions.
- Heating and frost-proofing of sheds and storage areas.

WORKING PRINCIPLE

Indirectly fired air heater that uses a radial (65kW; axial) fan to blow 100% dry and clean air through a heat exchanger.

ISA | Oil fired with flue connection

ISA-65

FEATURES

- Durable phosphated body panels with powder-coating.
- Automatic burner control with thermostat-connection.
- Hanging model, supplied with suspension eyes.
- Equipped with overheat-protection and temperature limitation of warm air.
- Supplied with Intercal industrial burner with flow control. Alternative burner available (Riello oil- or gas burner for instance).
- High efficiency heat exchanger (92°C)
- Outlet temperature of delta ΔT 35°C

APPLICATIONS

- Heating of greenhouses and polytunnels without risk of harmful CO₂ and CO.
- Heating and keeping free from frost of sheds, warehouses and stables.

ADVANTAGES

- Economic thanks to the high efficiency heat exchanger.
- 100% clean and dry heat.
- Operation with thermostat.

WORKING PRINCIPLE

Indirect diesel-fired heater that produces 100% clean and dry warm air by blowing air alongside a high efficiency heat exchanger with a powerful axial fan.

TAS | Direct oil fired

TAS-800

FEATURES

- Supplied with fresh air intake connection as a standard.
- High pressure pump for diesel and paraffin.
- Outlet temperature between 60°C - 100°C.
- Full humidity and dust proof control panel.
- With burner relay, photocell flame control, thermostat connection and limit thermostat.
- Separate fan for optimization of fresh air supply to the burner.
- Direct heat, 100 efficiency.

ADVANTAGES

- Easy and quick access for service and maintenance.
- Large air throw.

APPLICATIONS

- Heating of pig and poultry houses.
- Drying of agricultural produce.
- Heating of greenhouses and polytunnels
(NB: Only use petroleum and guard CO₂ and CO levels).

WORKING PRINCIPLE

A direct oil fired heater.
Attention: this product requires ventilation of the area at all times.

IMAC | Pellet fired heater with flue connection, containerized

IMAC-2000 pellet

IMAC-2000PC + pellet container silo

FEATURES

- An ash-container can be mounted for storage of ashes.
- The combustion chamber is heat resistant up to 850°C.
- Automatic burner control with thermostat connection.
- Pelltech pellet-burner with automatic pellet-feeding.
- Equipped with overheat protection, phase control and temperature limitation of warm air.
- Outlet temperature delta ΔT of about 47°C.
- High efficiency heat exchanger (92% Min).
- Supplied with flue gas fan as a standard.
- Supplied with auger for automatic disposal of ashes to ash-container.
- Supplied with EC fan as a standard.
- Stainless steel bodywork.

APPLICATIONS

- CO₂ neutral crop-drying.
- Heating of constructions sites, halls and warehouses.
- Heating of construction- and renovation projects.

ADVANTAGES

- Possibility of remote control and monitoring of the burner.
- Green/CO₂ neutral alternative for standard fossil fuels.
- Easily transportable with box girders and forklift slots.
- Protected against non-professional operation because of the lockable central control box and burner area.
- Logistic and storage advantages because of its robust stackable construction.
- Most of the ashes are removed automatically from the combustion chamber.

WORKING PRINCIPLE

Indirect pellet fired heater that produces 100% clean and dry, warm air by blowing air alongside a high efficiency heat exchanger with a powerful radial fan.

BIO ENERGY | Bio oil fired with flue connection

BIO ENERGY-1

FEATURES

- Overheat security thermostat, automatic security built in.
- Supplied with a axial fan (radial as an option)
- Odourless combustion of non-fossil fuels (100% biodiesel or other types)
- Models with several capacities available (27,41,59 kW maximum)
- High/Low capacity adjustment.
- Built-in tank of 50 ltr.
- Manual ignition.

APPLICATIONS

Heating of warehouses and contractors workshops and other spaces.

BIO ENERGY-2

ADVANTAGES

- Options available for increased efficiency of heat distribution: flue-booster and ducting set.
- Environment friendly heating of spaces.
- Quick and good distribution of warm air.
- Several non-fossil fuels can be used.

WORKING PRINCIPLE

A fuel pump supplies fuel to a burner-dish inside the combustion chamber; flue gasses are discharged of outside through a chimney, it is a closed system. The heat produced by the burning chamber is blown inside the space by means of a powerful fan.

VAL | Oil fired infra-red

VAL-6 1-STEP

FEATURES

- Equipped with photocell flame control for safe use.
- Possibility of thermostat operation.
- Stable set of wheels

ADVANTAGES

- The most important reason to purchase infrared heaters is because they produce radiation heat and, as a result, do not produce an airflow. Absence of an airflow is a big advantage for various projects in construction.
- This infrared-heater is used to heat up a specific area through its radiation. The heater has a remarkably high efficiency of 100% because all the fuel is transformed into heat.
- Because of the absence of an airflow, the radiation heater is silent.

APPLICATIONS

- Heating and defrosting machines and construction material.
- Local supply of heat to workshops, storage facilities, work areas and warehouses.

WORKING PRINCIPLE

Radiation heat without airflow through a ceramic shield.

AGA-E | Direct propane/natural gas fired

AGA-111 E

FEATURES

- Supplied with fresh air intake connection as a standard.
- Outlet temperature between 100°C - 130°C.
- Full humidity and dust proof control panel.
- Burner with electronic ignition, ionization protection and thermostat connection.
- Separate fan for optimization of fresh air supply to the burner. (except 100E)
- Direct heat, 100% efficiency.

ADVANTAGES

- All models can function both horizontally and vertically.
- Easy and quick access for service and maintenance.
- Large air throw.

APPLICATIONS

- Heating of pig and poultry houses.
- Drying of agricultural produce.
- Heating of greenhouses and polytunnels (NB: guard CO₂ en CO levels).

WORKING PRINCIPLE

A direct gas-fired heater.

Attention: this product requires ventilation of the area at all times. Installation by qualified personnel only.

GA | Direct propane gas fired

GA-60 E

FEATURES

- All GA models can be connected to a modulating system.
- Supplied with burner relay, ionization flame protection, thermostat connection and hose breakage protection.
- Clean combustion air through fresh outside air supply.
- Service-friendly, humidity- and dust proof control panel.
- Adjustable capacity.
- KIWA certified

ADVANTAGES

- Can be installed both horizontally and vertically to supply warm air to the fans of drying installations.
- Suspension brackets and wheel sets available as an option. (wheel set standard on GA-110)
- Large capacity.

APPLICATIONS

- Heating of greenhouses and polytunnels (control of CO₂ en CO levels imperative).
- Heating of pig- and poultry houses.
- Drying of agricultural produce.

WORKING PRINCIPLE

A direct gas-fired heater.

This product requires ventilation of the area at all times. Installation by qualified personnel only.

MS | Modulating control units propane gas

FEATURES

- A system consists of a servo motor with valve, a temperature management unit and a sensor.
- Parts of the unit can be connected with an external computer to serve larger temperature management systems.
- Several heaters can be connected depending on the system chosen with the possibility to manage different sections if required.
- Complete system for drying of agricultural produce, available in 3 versions.
- Modulation gas valve available in different power supplies (24/230V)
- Fire security system available.

ADVANTAGES

- Delivers a stable temperature in the space to be heated.
- The continuous functioning reduces restarting of the burners and increases the life time span of the heaters.
- Ensures a continuous air flow.
- Reduces humidity.

APPLICATIONS

For drying of agricultural produce.

WORKING PRINCIPLE

A modulating system manages continuously the burner capacity of Thermobile heaters by means of gas-pressure in relation with the pre-set temperature values required to dry agricultural produce. Only suited for propane.

Max. quantity of GA heaters to be connected

Accessories page 34 - 41

CH-72

FEATURES

- Double-walled stainless steel bodywork and outer casing.
- Equipped with one or more stainless steel heating elements.
- Supplied with one or more maximum thermostats that disconnect the heating elements during overheating as a result of low airflow or obstruction of the airflow.
- Automatic reset after cooling down.

ADVANTAGES

- Robust heater with a strong airflow.
- Because of the double walled construction, the outside of the heater will not be hot in case there is electricity failure nor will it damage the floor below it.
- The specially designed grid of the heater will prevent the floor of being heated directly and therefore avoid too fast drying of the object.
- Separate thermostat available (CH12/18) for operation when a specific temperature is needed.

APPLICATIONS

- Heating in construction sites.
- Drying support after water damage or renovations.

WORKING PRINCIPLE

A powerful axial fan blows air alongside the heating elements in order to heat up the air flow.

*CH-3 with 230 V cable. *CH-12/18 with 400 V cable + 32A plug; CH-72 with 400 V cable + 125A plug

VTB-15000/18000

FEATURES

- Double-walled stainless steel internal bodywork and outer casing.
- Supplied with one or more maximum thermostats that disconnect the heating elements during overheating as a result of low airflow or obstruction of the airflow.
- Automatic reset after cooling down.
- Operation with built-in thermostat.
- Equipped with one or more stainless steel heating elements.

ADVANTAGES

- Very robust heater with a very powerful airflow from a radial fan.
- Air-hoses can be mounted in order to supply heat to areas difficult to reach.
- Because of the double walled construction, the outside of the heater will not be hot in case of an electricity failure nor will it damage the floor below it.
- A very sustainable design that makes this heater suited for harsh and difficult working conditions.

APPLICATIONS

Heating of areas in construction sites and to support drying processes after water damage or during renovations.

WORKING PRINCIPLE

A powerful radial fan blows air alongside the heating elements in order to heat up the air flow.

*VTB-3000 with 230 V cable. *VTB-9000 with 400 V cable + 16 A plug

BX | Electric heater

BX-15

FEATURES

- Robust heater for professional use.
- Stable brace, also for wall mounting.
- Built-in thermostat.
- Stainless steel heating elements.
- Fixed outlet temperature between 30°C - 60°C.
- Selector switch with 6 positions for continuous fan operation or thermostat controlled fan operation

ADVANTAGES

- Suited for closed rooms.
- Immediate availability of warm air.

APPLICATIONS

- Heating of construction sites and building projects.
- Support during drying projects after water damage for instance and renovation projects combined with Thermobile dehumidifiers.
- Heating of temporary warehouses and showrooms.

WORKING PRINCIPLE

By means of an axial fan, air is blown alongside the heating elements to be heated.

TECHNICAL SPECIFICATIONS

TBD | Electric heater for pest control

TBD-18

FEATURES

- The device is equipped with a thermostat that is adjustable in a range between 20°C and 90°C and secures a constant flow of hot air needed for pest control purposes.
- The heater has a security maximum of 82°C. This means that if the room temperature reaches this level, the heater stops and needs to be reset manually.
- The TBD-18 has a built-in thermostat but can also be managed with an external thermostat.
- The heated air can be directed with precision to a specific spot.

ADVANTAGES

- Pestcontrol without using chemicals.
- No development of pesticide resistance.
- Very mobile device with wheels and handles.
- Efficient during all stages of larvae growth.
- Not harmful to humans.
- Easy to operate and to install

APPLICATIONS

Pestcontrol in hotels, houses, foodindustry, bakeries and industrial kitchens as well as libraries, archives and historic buildings.

WORKING PRINCIPLE

Ambient air is taken in by means of a fan and is blown through a series of electric heating elements into the room to be heated until it reaches a level that kills the vermin. The heating elements have a maximum capacity of 18 kW

TECHNICAL SPECIFICATIONS

TBD SERIES	18
Heat output (kW)	18

PROHEAT | Electric heater

PROHEAT-18

PROHEAT-18 stationary (on request)

FEATURES

- Equipped with a radial fan that ensures a powerful transport of hot air.
- Fixed outlet temperature; two steps: 9 and 18 kW.
- Electric air heater with built-in thermostat.
- Heating elements of stainless steel.
- 100% clean and dry heat.
- Suited for closed rooms.
- Air outlet at 3 sides.

APPLICATIONS

Used to heat up (pagoda)tents and showrooms.

ADVANTAGES

- Very efficient distribution of hot air in large spaces.
- Immediate functioning if electricity is available.
- External thermostat available as an option.
- Easy to move and to transport.

WORKING PRINCIPLE

A powerful radial fan blows air alongside the heating elements and heats up the air flow as a result.

PRODRY | Dehumidifier

44

62

96

FEATURES

- The Prodry dehumidifier has a solid metal body work.
- Stackable construction.
- Automatic stop when the water container is full.
- Equipped with an hour counter, hygostat and a defrosting system.

APPLICATIONS

- Dehumidifying after water damage because of leakage.
- Drying of areas in construction sites or renovation projects.
- Management of humidity level.

ADVANTAGES

- A condensate pump is available as an accessory.
- The air filter can be easily cleaned and replaced.

WORKING PRINCIPLE

Areas are dehumidified according to the condensation principle.

LR-2000 | Mobile air filter

FEATURES

- The LR-2000 filtration machine is equipped with a HEPA H-13 filter that removes 99,97% of all airborne particles and reduces the particle pollution considerably.
- Our LR-2000 features a 3-stage filter system. Two G3 filters in succession, one single layered and one framed double layered to capture particles like dust and flower pollen.

APPLICATIONS

Air filtration in closed off spaces.

ADVANTAGES

The third filter, the H13 HEPA filter will capture microscopic particulates as small as 0.3 microns at a 99,97% success rate. HEPA filters are used to clean the air from a variety of airborne contaminants, like mold and allergens in a large number of applications.

WORKING PRINCIPLE

Airfilter with HEPA-Filter

FANCOILS | Fancoils for boilers

FC-25

FC-115

FEATURES

- Equipped with a powerful fan with infinitely variable speed controller.
- Automatic control by means of built-in thermostat.
- Built-in in robust frame.
- Easy to move, equipped with wheels (13, 23 & 43).

APPLICATIONS

- For local heating and cooling.
- For building sites and events.

ADVANTAGES

Specific heat demand control.

WORKING PRINCIPLE

Contains a fan which draws the air in a space into the unit then blows it over a cooling or heating coil. The air comes out of the FCU either cooler or hotter than before.

COOLMOBILE-24 | Mobile spot-cooler

Our new spot-cooler COOLMOBILE-24 is flexible and easy to install and use.

This single fan spot cooler with a large air flow from 1.020 m³/hr is the ideal solution for a wide range of applications: from small rooms to large halls, along production lines and directed to special workplaces, next to heat sources and directly on sensitive equipment.

The COOLMOBILE-24 is specially designed for fast rental installation with a robust construction and castors for high mobility.

FEATURES

FRAME: Structure with panels made of sturdy galvanized steel, painted with epoxy powder ensuring high resistance to atmospheric agents and aggressive environments. The panels are removable to allow a quick inspection and maintenance of the internal parts.

FAN: 2-speed centrifugal double suction fan, built with sturdy blades in galvanized steel, statically and dynamically balanced.

AIR FILTER: The air filter, supplied as standard with the unit, is washable and easily replaceable.

APPLICATIONS

- Electronic-, computer- and server rooms, factories and workplaces.
- Professional kitchens.
- Party tents and halls.

TECHNICAL SPECIFICATIONS

COOLMOBILE	24

Cold air outlet Ø (mm)	2 x 135
Dimensions L*W*H (cm)	62*50*125
Weight (kg)	85
Item number	56.026.000

ADVANTAGES

- Can be installed quickly in emergency circumstances.
- Large container for condenswater.
- Little maintenance needed.
- Easy to move.
- The coolant used complies with the latest environmental requirements

WORKING PRINCIPLE

Heatpump system.

COOLMOBILE-220

FEATURES

- Supplied with hour counter, built-in thermostat and variable fan speed (3 stages).
- Allows the room-temperature to be reduced with 10°C, possibility for ventilation only.
- Easy to install, connection with quick release couplings, maximum of 30 meters between the units.
- Mobile split air-conditioning system.
- Standard power supply of 230V.

ADVANTAGES

- Extendable connecting leads allow 30 mtr distance between the in- and outdoor-units.
- Easy to move thanks to wheels and light weight.
- Large area of functioning.

APPLICATIONS

- Suited for cooling rooms up to 130 m3.
- For cooling tents, offices, exposition spaces, showrooms, kitchens and server-rooms.

WORKING PRINCIPLE

A split air-conditioning system with ventilation option. The cooling unit is placed inside whereas the heat exchanger, or condenser, is placed outside in order to release the increased temperature of the cooling agent.

AIR DISTRIBUTORS

FEATURES

This air diffuser can be adjusted manually to obtain the desired distribution of warm air. These diffusers have a beautiful design and they will match perfectly with the interior of any location. Easy to install with large logistic advantages because of weight and size. These air diffusers are to be used with Thermobile heaters with a capacity of 110 kW maximum.

FILTERCUBE | HEPA filtercube

FEATURES

- The system combines the supply of 35% fresh outdoor air with recirculation of 65% indoor air purified by HEPA filters.
- Removable HEPA (13) filters.
- Compatible with our IMA-150 RHP, IMA-200 RHP, IMAC-2000 (S,EC), and IMAC-4000 heaters.

APPLICATIONS

Extra filtration when inside air is contaminated with dust and other small particles.

ADVANTAGES

- Enables filtered recirculation and thus considerably reduces fuel costs.
- HEPA-13 filters filter 99,97% of particles out of the air, including aerosols and viruses.
- The Filtercube can be used at times when heating is not required.

WORKING PRINCIPLE

The system combines the supply of 35% fresh outdoor air with recirculation of 65% indoor air purified by HEPA filters.

Dimensions filter L*W*H (cm)	61*61*29
Dimensions cube L*W*H (cm)	108*118*142
Weight (kg)	220
Item number	41.730.150

FUEL TANKS | EnergyTender and Multitank

ENERGYTENDER-3000 NLC

FEATURES

- Available in 3 versions: 995, 2000 and 3000 litres.
- Lockable pump-room cabinet to protect against theft.
- Can easily be mounted onto a trailer.
- Meets current VLG/ADR and KIWA regulations. Allowed to be used at all locations.
- 2½" fill and 1½" level opening with brass cap.
- 1 x 1" suction pipe capped.
- 1 x 2" and 1 x 1" spare connection points with cap.
- Venting with outflow restrictor.
- Mechanical contents gauge.
- 2x suction pipe ½" and 2x return connection ½" with ball valve.
- Stackable during transport.

ADVANTAGES

- Robust design.
- Can be delivered in every RAL colour to match your company style.

ACCESSORIES

MULTITANK-1000 on optional tank-trolley

FEATURES

- Available in two sizes: 700 and 1000 litres.
- Approved for indoor usage. In case of outdoor installation, we recommend the optional lockable rain cover.
- For local transport the Multitank trolley is available as an accessory.
- Double-walled.
- Plastic (HDPE) inner tank (no rust).
- Metal outer tank with 100% bund.
- 2" female thread connections.
- Level meter.
- Leak detector.
- TÜV certified.

ADVANTAGES

- Compact model.
- Can easily be transported with the trolley.
- Easily connectable.

	Gas valve with servo motor MG-60, adjusting range 0,4-2 bar, connection 1/2".	
	40.301.029	MG-60, supply 230V 50/60 Hz, 3-point control with manual operation.
	40.301.055	MG-60, supply 230V 50/60 Hz, 3-point control, pot. meter 5k ohm for feedback.
	40.301.056	MG-60, supply 24V 50/60 Hz, control 0-10 Vdc.
	40.301.052	MG-60, supply 24V 50/60 Hz, 3-point control, pot. meter 1k ohm for feedback.
	40.301.054	MG-60, supply 24V 50/60 Hz, 3-point control.

	Gas valve with servo motor MG-40, adjusting range 0,4-2 bar, connection 1/2".	
	40.301.066	MG-40, supply 230V 50/60 Hz, 3-point control.
	40.301.067	MG-40, supply 24V 50/60 Hz, 3-point control with feedback.
	40.301.072	MG-40, supply 24V 50/60 Hz, 3-point control.
	40.301.054	MG-40, supply 24V 50/60 Hz, control 0-10 Vdc.

	Gas valve with servo motor MG-20, adjusting range 0,4-2 bar, connection 1/4" IN - 3/8" OUT.	
	40.301.058	MG-20, supply 230V 50/60 Hz, 3-point control.
	40.301.064	MG-20, supply 24V 50/60 Hz, control 0-10 Vdc.
	40.301.065	MG-20, supply 24V 50/60 Hz, 3-point control.
	40.301.077	MG-24, (DVGW approved for Germany) supply 230V 50/60 Hz, 3-point control.

	Fire protection.	
	40.301.045	Fire protection system for crop drying (propane gas), supply 230V.
	40.301.046	Fire protection system for crop drying (propane gas), supply 24V.
	40.301.047	Magnetic gas valve for propane gas, (230V) to place in gas supply pipe, Max. 60 kg/hr.
	40.301.080	Magnetic gas valve for propane gas, (24V) to place in gas supply pipe, Max. 60 kg/hr.
	40.301.049	Room-/maximum thermostat 0-50 °C.
40.301.093	Magnetic gas valve for propane gas, (DVGW approved for Germany) 230 VAC, to place in gas supply pipe (Max. 60kg/hr)	

	Special equipment.	
	40.301.033	Temperature probe PT 100 with 10m cable.
	40.301.063	Temperature probe PTC 1000 with 10m cable.
