

## Directions for use

### WATER MAKE-UP METALLIC PURE Water Make-up Metallic Pure

Grimas Water Make-up Metallic Pure is an extremely glossy, unperfumed, gluten-free, glossy water-based make-up, intended for face-painting and body-painting.

Pure means that the product in question does not contain any chemical preservatives (such as parabens) or halogenated organic compounds.

#### Procedure

Water Make-up (Pure) can be applied directly onto the skin, but you can also first apply a layer of Grimas Cake Make-up. This has the benefit of allowing the colours of Water Make-up (Pure) to be applied more evenly and more vividly and also that they are easier to remove later.

When you work with Water Make-up Pure, it is important to apply it to a clean, non-greasy skin. This will allow the make-up to stick to the skin better and to keep its effect longer. Water Make-up works just like watercolour paint. Use a brush or a make-up sponge and a little water to make the surface of the colour soft and pasty. Don't work too dry, but do not use too much water. Water Make-up (Pure) dries within 15 seconds.

If you do not want the colours to mix, be sure to wait for the first layer to dry before applying another colour over it or up against it. Regularly change the water you rinse your brushes in and work preferably with two water dishes: one for light and one for dark shades.

#### Removal

You can lightly wash the skin with lukewarm water and soap (or shampoo) to already remove a great part. Massage it in briefly and rinse off with lukewarm water. Scrubbing too much with water and soap or shampoo can irritate the skin. You can clean the skin further if required with a cleansing milk or cleansing cream. Massage it in gently and remove it with a soft tissue. Do not use Afschmink, as this contains waxes and oils which actually adhere the Water Make-up to the skin. Do not use ready-to-use cleansing cloths. If a trace of colour is left on the skin, it can be removed with Grimas Cleansing Lotion. Let the make-up dry out in the air and only put the lid back on when the Water Make-up is dry.

## Safety information

<b>Packaging:</b>	Colour: grey Content: 2.5 ml, 15 ml, 25 ml, 60 ml Palettes: 4 x 2,5 ml, 6 x 2,5 ml, 12 x 2.5 ml
<b>Appearance:</b>	Paste in glossy colours.
<b>Ingredients:</b>	See label and composition.
<b>Toxicology:</b>	Assessed against the Cosmetics Regulation (1223/2009/EC).
<b>Improper use:</b>	Assessed according to the standard of consuming regularly the content of the largest package size (60 ml). No toxicological effect.
<b>Bacteriology:</b>	Contains less than 50 CFUs/g of bacteria, yeasts and moulds. Pathogens: not present. Work hygienically: with clean hands, clean water and clean materials.
<b>Dermatology:</b>	See dermatological declaration.
<b>Use on children:</b>	Suitable for use on children. Has the Danish A-category certificate.
<b>Around the eyes:</b>	May be used near the eyes.
<b>On the mucous membranes:</b>	May be used on the mucous membranes.
<b>Make-up in the eyes:</b>	Rinse with water.
<b>Durability:</b>	See label with symbols:  = period-after-opening  = date of minimum durability
<b>Storage:</b>	Store in a dry, dark place. Dry with a tissue after use.

## Composition

### WATER MAKE-UP METALLIC PURE Water Make-up Metallic Pure

INCI	<%
Talc, Maltodextrin	50
Aqua	25
Diglycerin	25
Glycerin	25
Paraffinum liquidum, Lanolin oil	25
Kaolin	5
Silica	5
Ascorbyl palmitate	1
Caprylyl glycol	1
Cetearyl glucoside	1
Sodium cetearyl sulfate	1
Tocopheryl acetate	1
CI 77000	25
CI 77491	25
CI 77510	10
CI 15880	5

The ingredients that are present in the product in the greatest proportions are listed first.

Ingredients that are present in the product to less than 1%, are listed in random order at the end of the list. Then the pigments and colorants are addressed, even if they are used in large quantities.

< is less than.

## Dermatological declaration

### WATER MAKE-UP METALLIC PURE Water Make-up Metallic Pure

In the dermatological declaration one can read the following:  
The products have been dermatologically tested for 24, 48 and 72 hours on 30 persons with healthy skin. No irritation occurred.

#### CONCLUSION

No evidence of any skin disorder was detected in the test area of any of the 30 panellists after conducting patch testing for 24 h, 48 h and 72 hours according to the internationally recognised guidelines of ICDRG (International Contact Dermatitis Research Group).

It can be concluded that the use of the product will not cause any unwanted skin reactions due to an irritating effect.
