

## PRODUCT DATA SHEET

### Self-adhesive tape for the vapor barrier foil - 45000585

Universal tape based on a durable polyethylene carrier reinforced with a fabric mesh with a synthetic rubber adhesive with very good adhesion to many materials. The repair tape is waterproof and can be torn by hand. It can be used for various types of repair of damage, cracks and tears. It is perfect for joining lagging in air-conditioning and ventilation systems, foils of construction, insulation, PVC and PE, and for sealing PVC pipes.

### Technical specification:

FEATURE	UNIT	TOLERANCE	VALUE	NORM
Width	mm	$\pm 1,5$ mm	48	-
Lenght	m		25	-
Core diameter	mm		76	-
Colour			gray	
Tape thickness	$\mu$ m	$\pm 10\%$	150	EN 1942
Carrier			polyethylene + fabric mesh	
Glue			synthetic rubber	
Adhesion at 180°	N/25 mm		15,0 [ $\geq 10,0$ ]	EN 1939
Break point	%	$\pm 30\%$	450	
Tensile strength	N/mm <sup>2</sup>	$\pm 10\%$	20	
Shear	h		$\geq 120$	EN 1943
Operating temperature	°C		od -10 do + 50	-
