NEW PRODUCT ANNOUNCEMENT

DEADLY MISSILE IF DROPPED FROM 60' (18 M)

PEAKWORKS TOOL TETHERING SYSTEM

PeakWorks introduces a patented tool tethering system, designed to protect workers from tools dropped at height.

- Developed and manufactured in Canada
- The strongest, most secure tool anchor clamping system in the market
- Durable and long-lasting even in extreme hot or cold conditions
- Rigorously tested at the CSA test lab to ensure maximum safety and peace of mind

CLAMPS:

- Unique tool anchor clamps are specially designed to prevent tools from falling through commonly used 19-4 construction site grating – no other tool tethering system offers this added safety feature!
- Heavy-duty, reusable/repositionable HDPE clamps can be mounted onto a variety of flat, hex and round tools
- High-strength clamp fasteners are easily installed and removed using the hex key wrench provided
- Strong, moulded eye hole for quick attachment/detachment from lanyards with built-in carabiners
- Available in individual blister packs, 10-piece bulk packs, or 50-piece master packs (5 bulk packs of 10 pieces)

LANYARDS:

- Specially designed lanyards connect the tool anchor clamp to either the operator or to a suitable anchor point
- Both lanyards can also be used and mounted to a variety of tools that feature hanging hole openings (ie: adjustable wrenches and pipe wrenches)
