

# **Swivel Head Ratchets**

JET's unique new swivel head ratchets are different than most flex head ratchets. Only the head rotates, keeping the overall height of the ratchet at a minimum for access to hard to reach places. The 270° rotation of the head provides access at virtually any workable angle, and has no index teeth so you can set the angle anywhere you need it. You can even use it in-line like a ratcheting screwdriver! The 72 teeth mean you're never more than 5° away from the next tooth engagement. Available in 1/4", 3/8", and 1/2" drives. A real work saving tool!
