

14301, 14302, 14303, 14311, 14312, 14313 280PL Lift Front Welding Helmet

Key Features and Benefits:

Made especially for pipeline applications, the Jackson Safety® PL280 welding helmet comes with a spring-loaded lift front for maximum versatility, and the Super Tuff nylon material is built for the harshest welding extremes.

- Spring-loaded lift front provides added flexibility by eliminating the need to raise the hood during pre/post preparation work
- Patented 370 Speed Dial® ratcheting headgear achieves a perfect fit and creates the ultimate balance in comfort and functionality
- Super Tuff nylon material provides a lightweight yet durable design and performs in the harshest welding extremes
- Patented lens retention system provides effortless loading of filter, cover, and protective plates
- Exclusive Super Kool coating sheds spatter and reduces heat buildup found in traditional helmets (Models 14311, 14312, & 14313)
- Comes complete with a Z87.1+ high-impact polycarbonate window and a 2" x 4.25" Shade 10 filter
- Designed with enough room to fit most half-mask respirators

Prod. No.	Filter Dimensions/ Viewing Area	Shade	Color	Headgear	Weight	Warranty
