

## 115V 1-PHASE ELECTRIC CHAIN HOISTS

These JET® chain hoists are designed for portability and durability and made to perform in a wide range of industrial lifting applications.

JEH-18 and JEH-14 are designed for lifting necessary loads in light duty, commercial, and industrial applications.

### Key Features and Benefits:

- Aluminum alloy housing decreases the overall weight for convenient transportation
- Grade 80, black oxide-coated load chain for durability
- Heat-treated alloy steel geared drive train for long-lasting durability
- Upper and lower limit switches increase safety by preventing the load chain from over-travelling
- Equipped with slip clutch overload protection mechanism that prevents the hoist from lifting loads above its rated capacity
- Maintenance-free gear train with sealed oil bath eliminates maintenance
- Magnetic disk brake ensures the hoist stops rapidly and secures the load
- Meets ASME B30.16 Safety Standards
- CUL-certified electric motor
