ANZ = Australia / New Zealand	TW = Taiwan	KR = Korea	CN = China
MX = Mexico			

## Installing a Replacement Chip

1. Peel backing from adhesive as shown in Figure 1.

2. Locate the OEM chip on the ledge of the cartridge as shown in Figures 2a and 2b.

3. Place the Static Control chip onto the OEM chip as shown in Figures 3a and 3b.

**Note:** Make certain the edge of the Static Control chip is aligned with the edge of the OEM chip. This ensures proper placement and functionality.

---

---

## DEDICATION TO TRAINING

---

In order to produce consistent high quality prints that are virtually indistinguishable from the OEM, it is essential to follow Static Control's remanufacturing instructions exactly as directed. Static Control is dedicated to informing customers of the latest innovations in training and knowledge. Access to these instructions, our technical support staff and View on Demand Webinars is available to all customers in good standing.

## ELECTROPHOTOGRAPHICALLY MATCHED COMPONENTS

---

We provide these critical components that have been electrophotographically matched for use in remanufactured toner cartridges. It is vital that the critical components be replaced as a system to ensure consistent high quality performance. We provide additional components such as felts, foams and recovery blades, should you decide they are necessary. Using Static Control's system of components allows you to use less expensive non-virgin cartridges and create remanufactured cartridges that provide high quality prints virtually indistinguishable from the OEM.

## INDUSTRY LEADER

---

Static Control is the global leader in aftermarket imaging and remanufacturing technology. Offices are located worldwide and all research, development, manufacturing and engineering takes place at their Sanford, North Carolina, USA world headquarters. Currently, Static Control manufactures in-house over 8,000 imaging products and supplies over 15,000 imaging products to the aftermarket industry.
