

## 26" PRO35™ TOOL CHEST 3 DRAWERS BLACK

- Drawers capable of holding 30 kg, featuring smooth 3-step ball bearing slides
- Protective EVA mats in each drawer
- Heavy gauge steel construction, treated with a 5-step phosphate-free rust prevention process and a powder coat finish
- Includes a 3-digit combination lock and is equipped with recessed handles and non-slip rubber feet
- Fully compatible with the TengTools tool control system for customized tool arrangement

The TengTools 26" PRO35™ tool chest TSM26B3, in a sleek matte black finish, is a robust and versatile storage solution designed for professional environments. Measuring 660 mm in width, 305 mm in depth, and 250 mm in height, this middle box tool chest is a space-efficient addition to any workshop. This unit features three drawers: two with a height of 50 mm and one with a height of 75 mm. Each drawer, measuring 569 mm in width and 275 mm in depth, can comfortably accommodate four TengTools TC1 modules, making it highly compatible with the TengTools tool control system. This system allows users to customize their storage using either the compact TT Series or the protective FOAM Series modules in high-density EVA in three contrasting layers. The drawers are designed for durability and ease of use, each with a capacity of 30 kg and equipped with 3-step ball bearing slides for smooth operation. The user experience is enhanced by aluminium drawer handles that provide a reliable and comfortable grip. Additionally, each drawer is lined with an EVA mat, offering added protection for both tools and cabinet. The drawer mats have the added benefit of effectively dampen tool noise when opening the drawer and during transport. For added convenience, the tool chest includes recessed side handles, facilitating easy repositioning in the workspace. Stability is ensured by rubber feet, which also protect the working surface beneath from scratches. A 3-digit combination lock, that can be replaced with a key lock (optional), safeguards your tools against unauthorized access. Constructed from heavy gauge top-quality steel, this tool storage is built to withstand the rigors of a professional environment. The durability is further enhanced by a generous powder coating, which includes a 5-step phosphate-free rust prevention process ensuring longevity and maintaining the appearance of the tool chest over time.
