

26" PRO35™ STACK FOAM TOOL KIT 528 PIECES RED

- A 26" tool kit with 528 pieces tailored for mining and heavy industry
- 12-drawer stacked storage with 3-step ball bearing slides and a 30 kg capacity per drawer
- Heavy gauge steel construction enhanced by a 5-step phosphate-free rust prevention process and a powder coat finish
- Features 5" castors and a comfort grip handle for easy mobility
- Includes a broad range of tools secured by 3-digit combination locks
- TengTools tool control system in high-density EVA foam

The TengTools 26" PRO35™ tool kit TKS26R528F tool kit encompasses 528 pieces, providing an extensive tool range for the challenging environments of mining and heavy industry. This 2-tiered stack system includes the TSW26R7 roller cabinet and the TST26R5F tool chest, together forming a 12-drawer storage system. The overall dimensions are 680 mm in width, 460 mm in depth, and 1430 mm in height with castors, making it a sizable yet manageable tool kit. The roller cabinet consists of seven drawers, with five measuring 75 mm in height and two taller drawers at 154 mm, each able to support up to 40 kg. The TST26R5F tool chest adds five more drawers – two at 50 mm and three at 75 mm in height, that can be covered by a drop front with the TengTools logo for secure closure and a distinctive appearance. The tool kit is equipped for a wide array of tasks, including various sizes of impact sockets, spanners, screwdrivers, bits, nut drivers, T-handles, and pliers. All tools are organized in three-color precision cut high-density EVA foam modules, which is a factor in quickly identifying missing tools to maintain efficiency and safety in mining operations. The roller cabinet is designed for ease of movement, featuring two 5" braked swivel castors and two 5" fixed castors, along with a comfort grip handle. Both the roller cabinet and tool chest have drawers operating on 3-step ball bearing slides with durable aluminium handles. Security is enhanced with a 3-digit combination lock on each unit to protect valuable tools. The heavy gauge top-quality steel construction of these units ensures they can endure the demands of professional use in tough environments. Additionally, both units have been subjected to a 5-step phosphate-free rust prevention process and are finished with a durable powder coating in matte red.
