

37" PRO35™ STACK TOOL STORAGE 12 DRAWERS RED

- 37" mobile tool stack with 12 drawers for diverse tool storage
- 3-step ball bearing slides and EVA mats in drawers for smooth and noise-reduced operation
- Constructed from heavy gauge steel treated with a 5-step phosphate-free rust prevention process and a powder coat finish for durability
- Heavy-duty castors with brakes and a comfort grip handle ensure easy and stable mobility
- Compatible with combinations of modules in the TengTools tool control system

The TengTools 37" PRO35™ stack TSS37R12 in matte red is a robust mobile tool storage for professional environments in industrial sectors. This stack system combines a 37" 5-drawer tool chest on a 37" 7-drawer roller cabinet, resulting in a comprehensive 12-drawer storage solution. With dimensions of 964 mm in width, 460 mm in depth, and a height of 1450 mm with castors, it offers ample space for a wide range of tools. Each drawer is capable of accommodating any combination of TengTools modules matching the overall dimensions of six TC1 modules, one TCX4 module, and one TCX2 module, offering considerable flexibility in tool organization. The drawers have a depth of 380 mm and a width of 860 mm. Their heights vary with two drawers that are 50 mm in height, eight that are 75 mm in height, and two taller drawers that are 154 mm in height. The taller drawers at the bottom have an increased capacity of 40 kg, ensuring that both standard and larger tools can be stored efficiently. The stack features 3-step ball bearing slides on each drawer, ensuring smooth operation. To protect and secure the tools each drawer is equipped with an EVA mat, reducing movement and noise. Constructed from high-quality heavy gauge steel, this tool storage system is built for durability and to withstand the daily challenges that comes with professional use. It is treated with a 5-step phosphate-free rust prevention process for added corrosion resistance to ensure its longevity and maintain a pristine appearance. The maneuverability and stability of this stack is facilitated by 2" wide heavy-duty castors, including two 5" braked swivel castors and two 5" fixed castors. A comfort grip handle on the roller cabinet and recessed side handles on the top chest enhance its mobile characteristics. Safety is a priority, so the stack includes fixing brackets to securely attach the tool chest to the cabinet and thereby minimize any risk of it tipping over. Each unit is also equipped with a 3-digit combination lock for secure storage.

SPECIFICATIONS
