

## FIXING BRACKETS FOR 26" 3-DRAWER TOOL CHEST

- Enhances stability and security of storage systems
- Prevents tipping when relocating stacked tool chests and roller cabinet combinations
- Simple hook and screw mechanism ensures easy and secure installation
- Designed specifically for TengTools chest and cabinet integration
- Comes in a set of two for a complete solution

The TengTools black tool chest fixing brackets TCF05 comes in a set of two pieces and are engineered to enhance the stability and security of your TengTools storage system. These brackets are specifically designed to securely attach a TengTools tool chest onto a TengTools cabinet. Installation is straightforward: the brackets hook onto the side handle of the tool chest and then attach to the roller cabinet lip. Once in place, tightening the integrated screw secures the chest to the cabinet, preventing any movement or tipping when the combined stack system is relocated. This feature is particularly valuable in dynamic workshop environments where mobility without sacrificing stability is of importance. These brackets are compatible with TengTools TSM26R3 and TSM26B3 26" 3 drawer tool chests.
