

37" PRO35™ ROLLER CABINET FOAM TOOL KIT 637 PIECES RED

- A 637-piece 37" tool kit for mechanics, housed in a matte red 3-piece heavy gauge steel cabinet frame roller cabinet with seven drawers
- Includes essential mechanic tools organized in high-density EVA foam trays for easy identification and loss prevention
- Equipped with heavy-duty castors and a comfort grip handle for mobility, plus a 3-digit combination lock for security
- Enhanced by a phosphate free 5-step rust prevention process for durability and corrosion resistance
- Features TengTools Tool Control system

The TengTools 37" PRO35™ roller cabinet tool kit TKW37R637F is crafted for mechanics and features a comprehensive 637-piece collection. Housed in a matte red TSW37R7 roller cabinet built for durability, this tool kit combines storage capacity with precision organization to fulfil the needs of professional mechanical work. The tool kit measures 964 mm in width, 460 mm in depth, and 813 mm in height, extending to 985 mm with castors. This substantial size accommodates a broad spectrum of tools while maintaining a manageable footprint in the workshop. The cabinet includes seven drawers: five with a height of 75 mm for standard tools and two larger drawers at 154 mm, suitable for bulkier equipment. The first five drawers support up to 25 kg each, with the larger drawers capable of holding 40 kg each. Each drawer features 3-step ball bearing slides for smooth operation and is lined with an EVA mat to protect tools and minimize noise. This kit covers an extensive range of tools crucial for mechanics: 1/4, 3/8, and 1/2 drive sockets, bit sockets, ratchets, files, pliers, power grips, combination spanners, screwdrivers, bits, T-handle hex & tx keys, torque wrench, impact tools, and a variety of general tools. All tools are methodically arranged in three-color precision-cut high-density EVA foam trays. This arrangement not only ensures each tool has a specific place but also helps in quickly identifying any missing tools, thereby preventing loss or misplacement during work. With its 3-piece heavy gauge steel frame construction, the roller cabinet is built to withstand the challenges of professional mechanical environments. It has undergone a 5-step phosphate-free rust prevention process, further ensuring durability and resistance to corrosion. The powder-coated finish not only adds to its aesthetic appeal but also enhances its longevity. Sturdy 2" wide and 5" tall heavy-duty castors, including two braked swivel castors and two fixed castors, ensures both mobility and stability in the workshop. The castors are complemented by a comfort grip handle on the side of the cabinet that aids in maneuvering. An additional feature is the 3-digit combination lock that provides a layer of security. Included are six TEZ01 three-color precision cut high-density EVA foam storage modules (size X2) with three compartments each, perfect for organizing small items within the tool kit or workstation. The unit also includes a TC-TB03 – 18 mm laminated MDF worktop, adding a practical and durable surface for various tasks.

SPECIFICATIONS

Country of origin	Taiwan	Fixed casters	2
Barcode	5020385215580	Type of work top	5 mm EVA mat
