

AccuFit™

WIPER BLADES

PRODUCT DESCRIPTION

NAPA AccuFit™ wiper blades are Original Equipment style replacements, designed to match the fit, form, and function of the wiper blades originally installed on your vehicle. Each wiper blade comes with the correct adapter pre-installed, making installation quick and hassle-free—no sorting through multiple adapters to find the right one.

The AccuFit™ lineup includes beam, hybrid, conventional, and rear wiper blades in lengths ranging from 8" to 29", providing coverage for a wide variety of vehicles.

FEATURES & BENEFITS

BEAM

Like Original Equipment blades, all AccuFit™ beam blades feature an asymmetrical spoiler that uses airflow to improve windshield contact. Their advanced beam blade design evenly distributes pressure across the entire wiping element, ensuring consistent contact with the windshield for a cleaner, more precise wipe. AccuFit™ beam blades are also engineered to fit a wider range of newer wiper arm types, expanding vehicle coverage and increasing sales opportunities.

Available in lengths of 14" to 29"

HYBRID

AccuFit™ hybrid blades feature a durable, polymer shell same as Original Equipment hybrid blades, that help protect the wiper blade from harsh weather and road debris. Engineered to deliver a smooth, precise wipe, they provide reliable performance in a variety of driving conditions. Designed to fit Hook style wiper arms, AccuFit™ hybrid wiper blades install quickly and easily for an effortless replacement.

Available in lengths of 14" to 28"

CONVENTIONAL

Built with an all-metal, riveted construction for exceptional strength and long-lasting durability. The pre-attached adapter provides broad compatibility with Hook, Side Lock, and Bayonet wiper arms for quick and easy installation. Featuring a twin-rail wiping element design that matches Original Equipment specifications, this blade delivers reliable, consistent performance. An electrostatic paint coating adds an extra layer of protection, enhancing durability by resisting corrosion and rust.

Available in lengths of 11" to 28"

REAR

AccuFit™ rear wiper blades are designed to match the original rear blade style installed on the vehicle, including beam, integral, and conventional designs, ensuring an OE quality fit and performance. The AccuFit™ rear line also offers expanded coverage with additional blade lengths and compatibility with newer rear wiper arm styles, providing broader vehicle coverage. With reliable front and rear wiper solutions, AccuFit™ helps deliver clear visibility in every direction.

Available in lengths of 8" to 16"
