

FULL SYNTHETIC CVT TRANSMISSION FLUID

DESCRIPTION:

PEAK® FULL SYNTHETIC CVT TRANSMISSION FLUID is designed to meet the difficult challenges of effectively balancing frictional performance needs and durability required in today's Continuously Variable Transmissions. Suitable for service fill and recommended in most belt- or chain-driven CVTs. Do not use in non-CVT automatic transmission applications.

BENEFITS:

- Superior friction control delivers superior friction stability to maintain smooth, consistent shifting and prevent shudder
- Excellent anti-wear and oxidation stability protection to prevent metal-to-metal contact between rotating parts
- Full synthetic base provides resists low temperature viscosity change and high operating temperature oil thickening.
- Compatible in multiple CVT transmission types

APPLICATION:

Suitable for service fill fluid. Consult vehicle owner's manual for specific fluid recommendation.
