NORTH AMERICAN VEHICLES

YELLOW ANTIFREEZE + COOLANT

DESCRIPTION

PEAK® ORIGINAL EQUIPMENT TECHNOLOGY® ANTIFREEZE + COOLANT for **NORTH AMERICAN VEHICLES** is a line of premium coolants specifically designed to match the technology and color requirements of North American vehicles. Each coolant is formulated with the same corrosion inhibitor technology that protected your vehicle straight from the factory. Color cues on the packaging and a list of covered vehicles on the front label make it easy to identify the right match for your specific vehicle.

PEAK ORIGINAL EQUIPMENT TECHNOLOGY ANTIFREEZE + COOLANT for **NORTH AMERICAN VEHICLES YELLOW** is an extended life antifreeze/coolant based on proprietary Phosphate-Enhanced Organic Acid Technology. The ethylene glycol-based formula combines a mixture of organic acid corrosion inhibitors, stabilized silicate and a nitrite/nitrate combination to provide complete corrosion protection to both gasoline and diesel engines for all Ford and Lincoln vehicles 2019 and newer.

PEAK ORIGINAL EQUIPMENT TECHNOLOGY ANTIFREEZE + COOLANT for **NORTH AMERICAN VEHICLES YELLOW** is free of silicate, borate, nitrite, and amines, and is fully compatible with other extended life coolants. It meets the performance requirements of Ford WSS-M97B57-A1, ASTM D3306 and D4985. When installed as part of a complete flush and coolant fill, PEAK guarantees this coolant will provide service life protection of up to 200,000 miles or 10 years.
