PLANNING CONSIDERATIONS

BLACK CLASHING

Black clashing recommended on front facing edges where products are located and on side cabinets if cabinet is rebated.

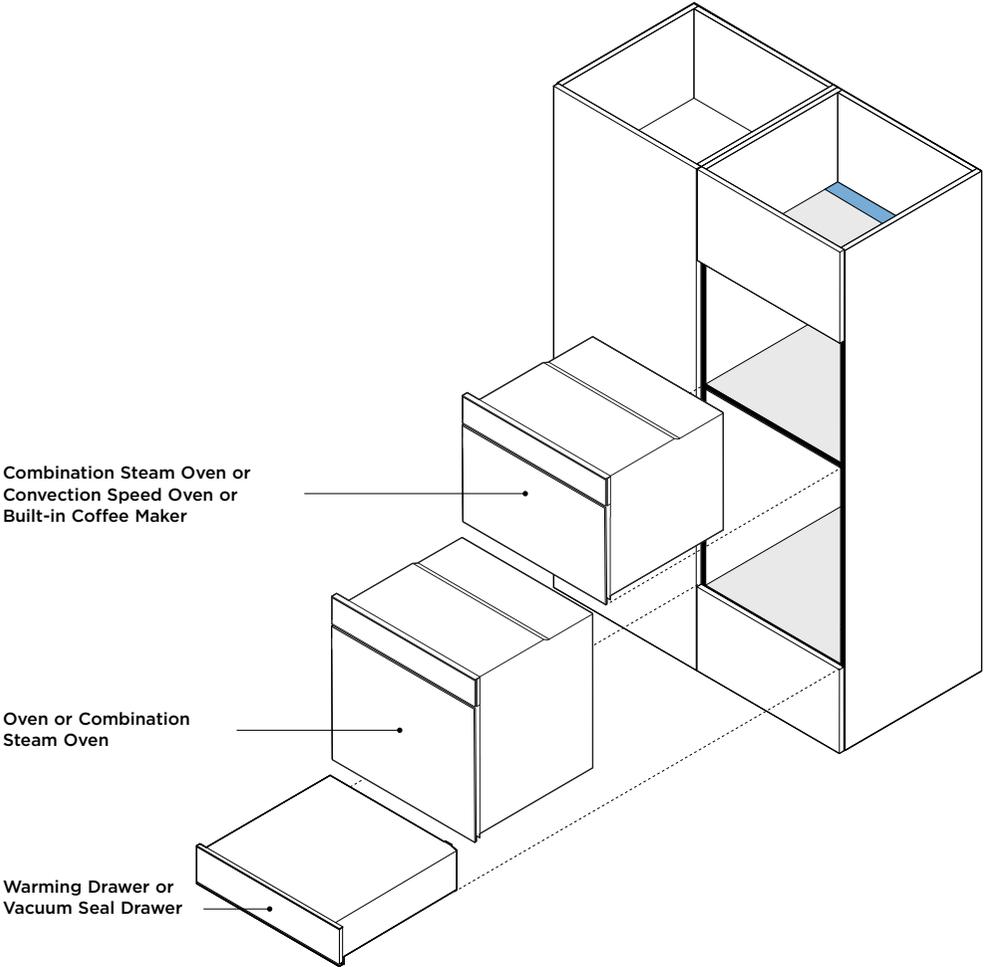

DIVIDING SHELF

If the cabinetry front panels are thinner than 13/16" (20mm) (less than the thickness of the appliance front) a rebate is required for the appliance to achieve a flush finish.

LEVEL CABINETRY

Check the shelves are level and the side panels are straight.

The models shown in this Planning Guide may not be available in all markets and are subject to change at any time. Product specifications may vary from those shown. This Planning Guide should not be used as installation guidance for any product. Further information is required to safely and correctly install the products featured here. Specific installation guidance will be available on our website fisherpaykel.com

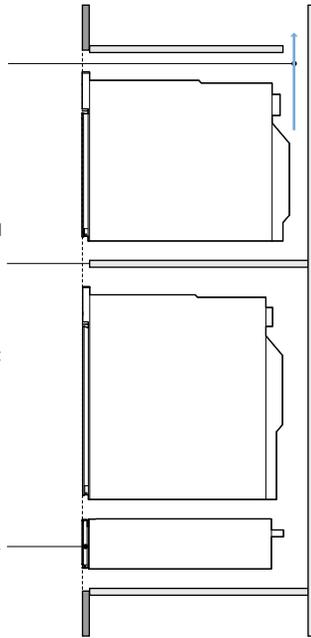

Ventilation air vent is required at rear for some products.

Dividing shelves are required to support stacked appliances and to achieve correct clearance.

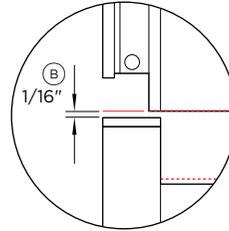

Dividing shelves must be constructed from material that will support the weight of the appliances.

Ensure the oven is not bearing any weight from cabinetry or products installed above.

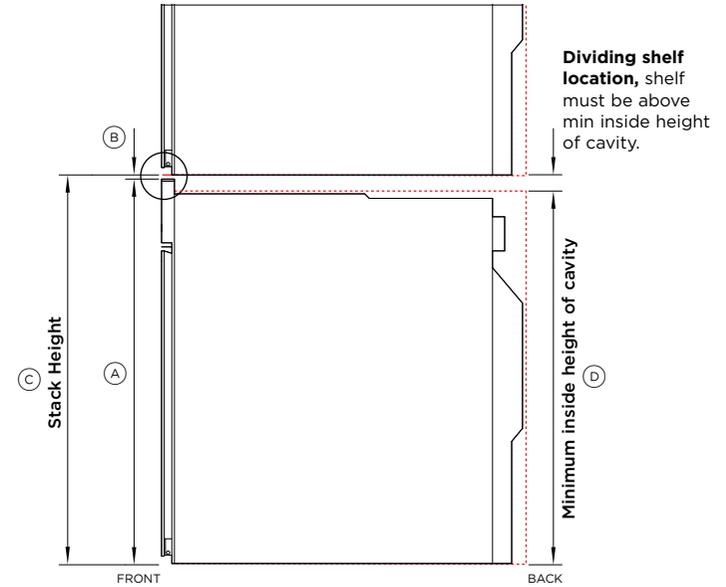

Warming Drawers and Vacuum Seal Drawers can fully support a 60cm Fisher & Paykel oven, without adding a shelf in between.
