

Certikin Manufactured Spa Covers

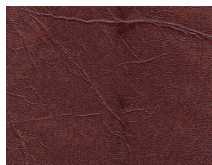

Certikin spa covers are created from the highest-grade materials at our purposely equipped Leeds manufacturing facility.

Rigorous testing has taken place to ensure the finished product meets the requirements for spa covers within the recently launched European Domestic Spa Standard EN17125, and also the safety aspects of the commonly quoted American Standard ASTM F1346-91.

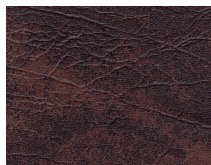

Our spa covers are made to order to almost any size and shape, with some common sizes and colours being held in stock for quick dispatch. The use of superior materials throughout results in a premium-quality product offering high levels of durability and heat retention at a competitive price – speak to our Witney based spa division for further details.
