

ASTRALPOOL – SURFACE CLEANERS

Cleans the pool basin

- Removes dirt, metals and lime from the pool surface

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
			2L / 10m ³

PROPERTIES

Appearance	Liquid
Colour	Yellow
pH (5% a 20°C)	0 - 1
Density	1,17 ± 0,05 g/cm. ³

CHARACTERISTICS

Detergent cleaner developed to eliminate calcareous incrustations, organic residues and mineral sediments formed in the pool surface.

INSTRUCTIONS FOR USE

1) General cleaning of the empty pool.

- Ensure the pool is drained. Do not dilute the product before applying directly onto surfaces that need cleaning.
 - Leave the product for approximately half an hour, and then rinse with plenty of water. If the scale persists the treatment must be repeated.
 - In parts where the incrustations are very dense the action of the product can be helped by scrubbing with a brush.
- Apply the product with spray that does not form a mist or with a watering can.

2) Cleaning of the filters.

This treatment is only for sand filters.

- Empty the water from the interior of the filter completely.
- Open the filter and pour in the product making sure the product is covering the filtering load.

- c) Allow the product to react for approximately half an hour.
- d) Close the filter and then proceed with an intense wash.

Recommendations:

- 1) Before cleaning the inside of the pool, its surfaces (floor, tiles, ceramic tiles, etc.) must be well dampened with water.
- 2) After cleaning with the product the surfaces should be rinsed with plenty of water to remove all traces of the product.
- 3) If cleaning is carried out in the open air, avoid working in direct sunlight and ensure that the product is not allowed to dry.
- 4) When the pool is first being cleaned it is recommended that the product be used in its undiluted form.

DOSAGE

Add 20 liters of product for every 100m³ of water.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
