

FOR CLEANING
ABOVE-GROUND POOLS

KONTIKI 2

1 EFFICIENT SUCTION

The principle behind a **hydraulic motor**, exclusively available with Zodiac® cleaners, is proven. The flexible membrane opens and closes with the water flow, creating pressure and vacuum.

2 UNFAILING MOBILITY

For above-ground, rigid-walled pools and for cleaning the floor only, the Kontiki 2 is one of the best-performing cleaners in its category. Its fins optimise **its movement for wider cleaning coverage**.

3 EASE OF INSTALLATION

With two adapters and two hose deflectors included, it is very easy to **connect directly to the skimmer or the suction point**.

FOR WHICH TYPE OF POOLS?

1 FOR IN-GROUND AND ABOVE-GROUND POOLS WITH RIGID WALLS

2 FOR ALL POOL SHAPES UP TO 8 X 4 M

3 FLAT FLOOR, GENTLE SLOPE AND COMPOSITE SLOPE

5 CLEANS FLOOR AND WALLS

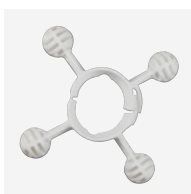

TECHNICAL SPECIFICATIONS

Hose length	8 sections of 1 m
Cleaner size (L x W x h)	48 x 20 x 40 cm
Packaging dimensions (L x W x H)	101 x 31,5 x 33 cm
Cleaner weight (head)	1,3 kg (Packaged weight: 5,5 kg)
Filtering capacity	Pool filtering circuit
Cleaned width	40 cm
Minimum required filter pump power	1/2 HP
Displacement speed	6 m/min

STANDARD FEATURES

Wheel deflector

Hose deflectors (x2)

Adaptors (x2)

AVAILABLE ACCESSORIES

Wintering Hoses Bag
Set of 6 x 1 m hoses
Flow gauge

Hydraulic cleaners are easily installed on the swimming pool filtration system, using power from its pump to operate. They capture debris by suction, storing it in the pump pre-filter. They are perfect for small pools with flat floors or gentle slopes and are the ideal solution for above-ground pools.
