

# AQUARMONY

UNDERWATER LOUDSPEAKER

**AQUARMONY** loudspeaker with fixed installation niche

**AQUARMONY** loudspeaker

**NOVELTY**  
It has been manufactured with high quality components, innovative technologies and special assembling methodologies, which allow to correct functioning also when plunged into saline water or water with high chloride content.

**POWERFUL**  
Its diaphragm allows the radiation of considerable energy amounts with a low degree of power-loss and good frequency response.

**EXCITING**  
Aquarmony helps every sports session to get more interesting and motivating.

**ENJOYABLE**  
Aquarmony encourages and supports the game, the animation as well as the relaxing in your swimming pool.

**IT IS EASY TO BE INSTALLED**  
Thanks to standard niches for underwater lights, a fixed installation proves to be extremely simplified, while the mobile version is immediate and does not require any intervention.

**Here an example of AQUARMONY loudspeaker installation in a swimming-pool with reinforced-concrete structure.**

**SPECIFICATION**

Max. power	40 W
Impedance	4 ohm
Frequency response	200-12 000 Hz
Dispersion underwater	omnidirectional
Cable length	80 mt
Installation depth	40 cm
Weight	5 kg
Length of the cable	5 m
