

## ctx500 ALGASTOP

### Prevents algae formation and growth

- High bactericide, algaecide and fungicide power.
- Fast-working, long-lasting.

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	WEEKLY		50ml /10m <sup>3</sup>

### PROPIEDADES

Appearance	Liquid
Colour	Blue
pH (20°C)	5-9
Density (20°C)	0,98 - 1,02 gr./cm <sup>3</sup>

### CARACTERÍSTICAS

Effective fast-acting quaternary ammonium compound, with a powerful bactericidal, fungicidal and algicidal action, intended for the prevention and elimination of algae.

### MODO DE EMPLEO

Pour the necessary dose of product into a container with water and distribute this solution evenly over the surface of the pool. It will preferably be done at sunset and without the presence of swimmers in the pool.

**Periodic disinfection of the pool glass:** Before refilling the pool, it is recommended to impregnate the walls and the bottom with a product solution (1 lt. Of the product in 10 lts. Of water) thus forming a protective film of action disinfectant.

**Disinfection of the pool environment:** The surfaces that are part of the pool environment can become slippery and can be a vehicle for transmitting diseases. To avoid these inconveniences, we recommend applying a product solution (5 liters of the product in 10 liters of water) daily by means of a sprayer or watering can.

After one hour these surfaces should be rinsed with plenty of water.

## DOSIFICACIÓN

**Initial Treatment:** Add 2 litres of product per 100 m<sup>3</sup> of water.

The Initial treatment should be repeated whenever the water does not appear transparent.

**Tratamiento de mantenimiento:** Add 0,5L for every 100m<sup>3</sup> of water once a week.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
