HPO

1 FULL INVERTER TECHNOLOGY: SILENT AND ECONOMICAL

Both compressor and fan operate on a 10 speed-range. HPO guarantees an **adjusted energy consumption and noise level**, according to the exact need of power.

2 INTELLIGENT HEATING REGULATION WITH POWER MODE SELECTION

- **Boost:** max power for fast heat-up
- **Smart:** automatic power adjustment depending on temperature
- **Ecosilence:** reduced power, further energy savings and lowest noise level

3 WIDE RANGE OF POWERS

Thanks to **6 power levels**, from 6,3kW to 17,7 kW*, HPO range suits most pools, from the smallest up to 145 m³**, for either heating or cooling.

* Air 15°C / Water 26°C / Humidity 70%

** Estimated volume for private pool used from beginning of May to end of September, with average 1,5m depth, 14hrs of filtration & a cover. Use the Zodiac® online selection tool for finetuned estimation.

** For the HPO heat pumps sold from 1st January 2023.

► **The COP or coefficient of performance** is the ratio between the power supplied to the water in the pool and the electricity consumption of the heat pump. For example, a COP of 4 means that for 1 kWh consumed on the electricity meter, the heat pump supplies 4 times more energy to the water in the pool, that's 4 kWh.

So **the higher the COP, the more efficient and economical the system.**

Important: the COP depends on temperature (air and water) and humidity.

Easy to install, Zodiac® heat pumps are the ideal solution for heating your pool and using it more often throughout the year, while also saving energy.

Around 80% of the energy used to heat your pool... comes from the air!
