CLARISAVE

FOR CONSCIOUS CLEANING

ASTRALPOOL ®

CARTRIDGE FILTERS

ClariSave cartridge filters are the **most sustainable** choice for taking care and maintaining residential pools of any size.

EFFICIENT FILTRATION

Crystal-clear water at all times thanks to the filter fineness of its drain mesh that sifts particles of up to 20 micra, which are imperceptible to the human eye.

SAVE WITH EVERY DROP

The technology used to form layers inside the filter discharge an even delivery of the water flow. As the dirt is evenly dispersed the cartridge takes longer to clog up, which makes it possible to **prolong the time between washes by up to 20%** and to lengthen the service life of this consumable.

When the cartridge is taken out to be cleaned, the loss of water is avoided thanks to the tank's top opening system. As the cleaning process just involves a quick hosedown, this results in **reduced water consumption** in comparison with a traditional backwash.

QUICK, EASY ASSEMBLY

ClariSave is a compact, lightweight, resistant filter, designed to deliver a hassle-free assembly and maintenance experience. The top cover comes with **handles** that make the unit easy to carry around and handle.
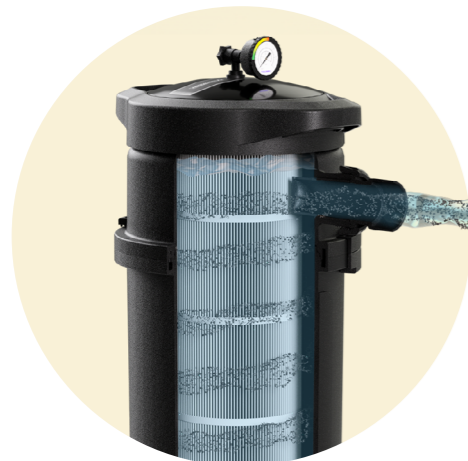

Once fitted in a technical room, its **adjustable connections** easily adapt to the position of the piping. This direct connection without the need to fit a multiport valve contribute to streamlining the installation process.

In addition, the **glycerin pressure gauge** provides clear, accurate pressure readings. Adjust the **clogging indicator** during set-up to optimize maintenance.

TECHNICAL SPECIFICATIONS

Complies with Standard
EN 16713-01

CODE	77113	77114	77115	77116
Filtration surface area (m²)	7.8	10	12	14
