SWIMSPA MEDITERRANEA

Fitness pool & Spa

If your project takes up 10 sqm, you will be able to enjoy a fitness swimming pool to swim and relax all the year round.

ASTRALPOOL presents the most elegant Swimspa of the world. Its design will turn any Wellness space into an environment of luxury.

It is possible to install both outdoors and indoors. Its installation is quick and simple.

The Swimspa Mediterranea is provided with the whole hydro massage equipment, a complete cross-current swimming system and the heating and purification unit.

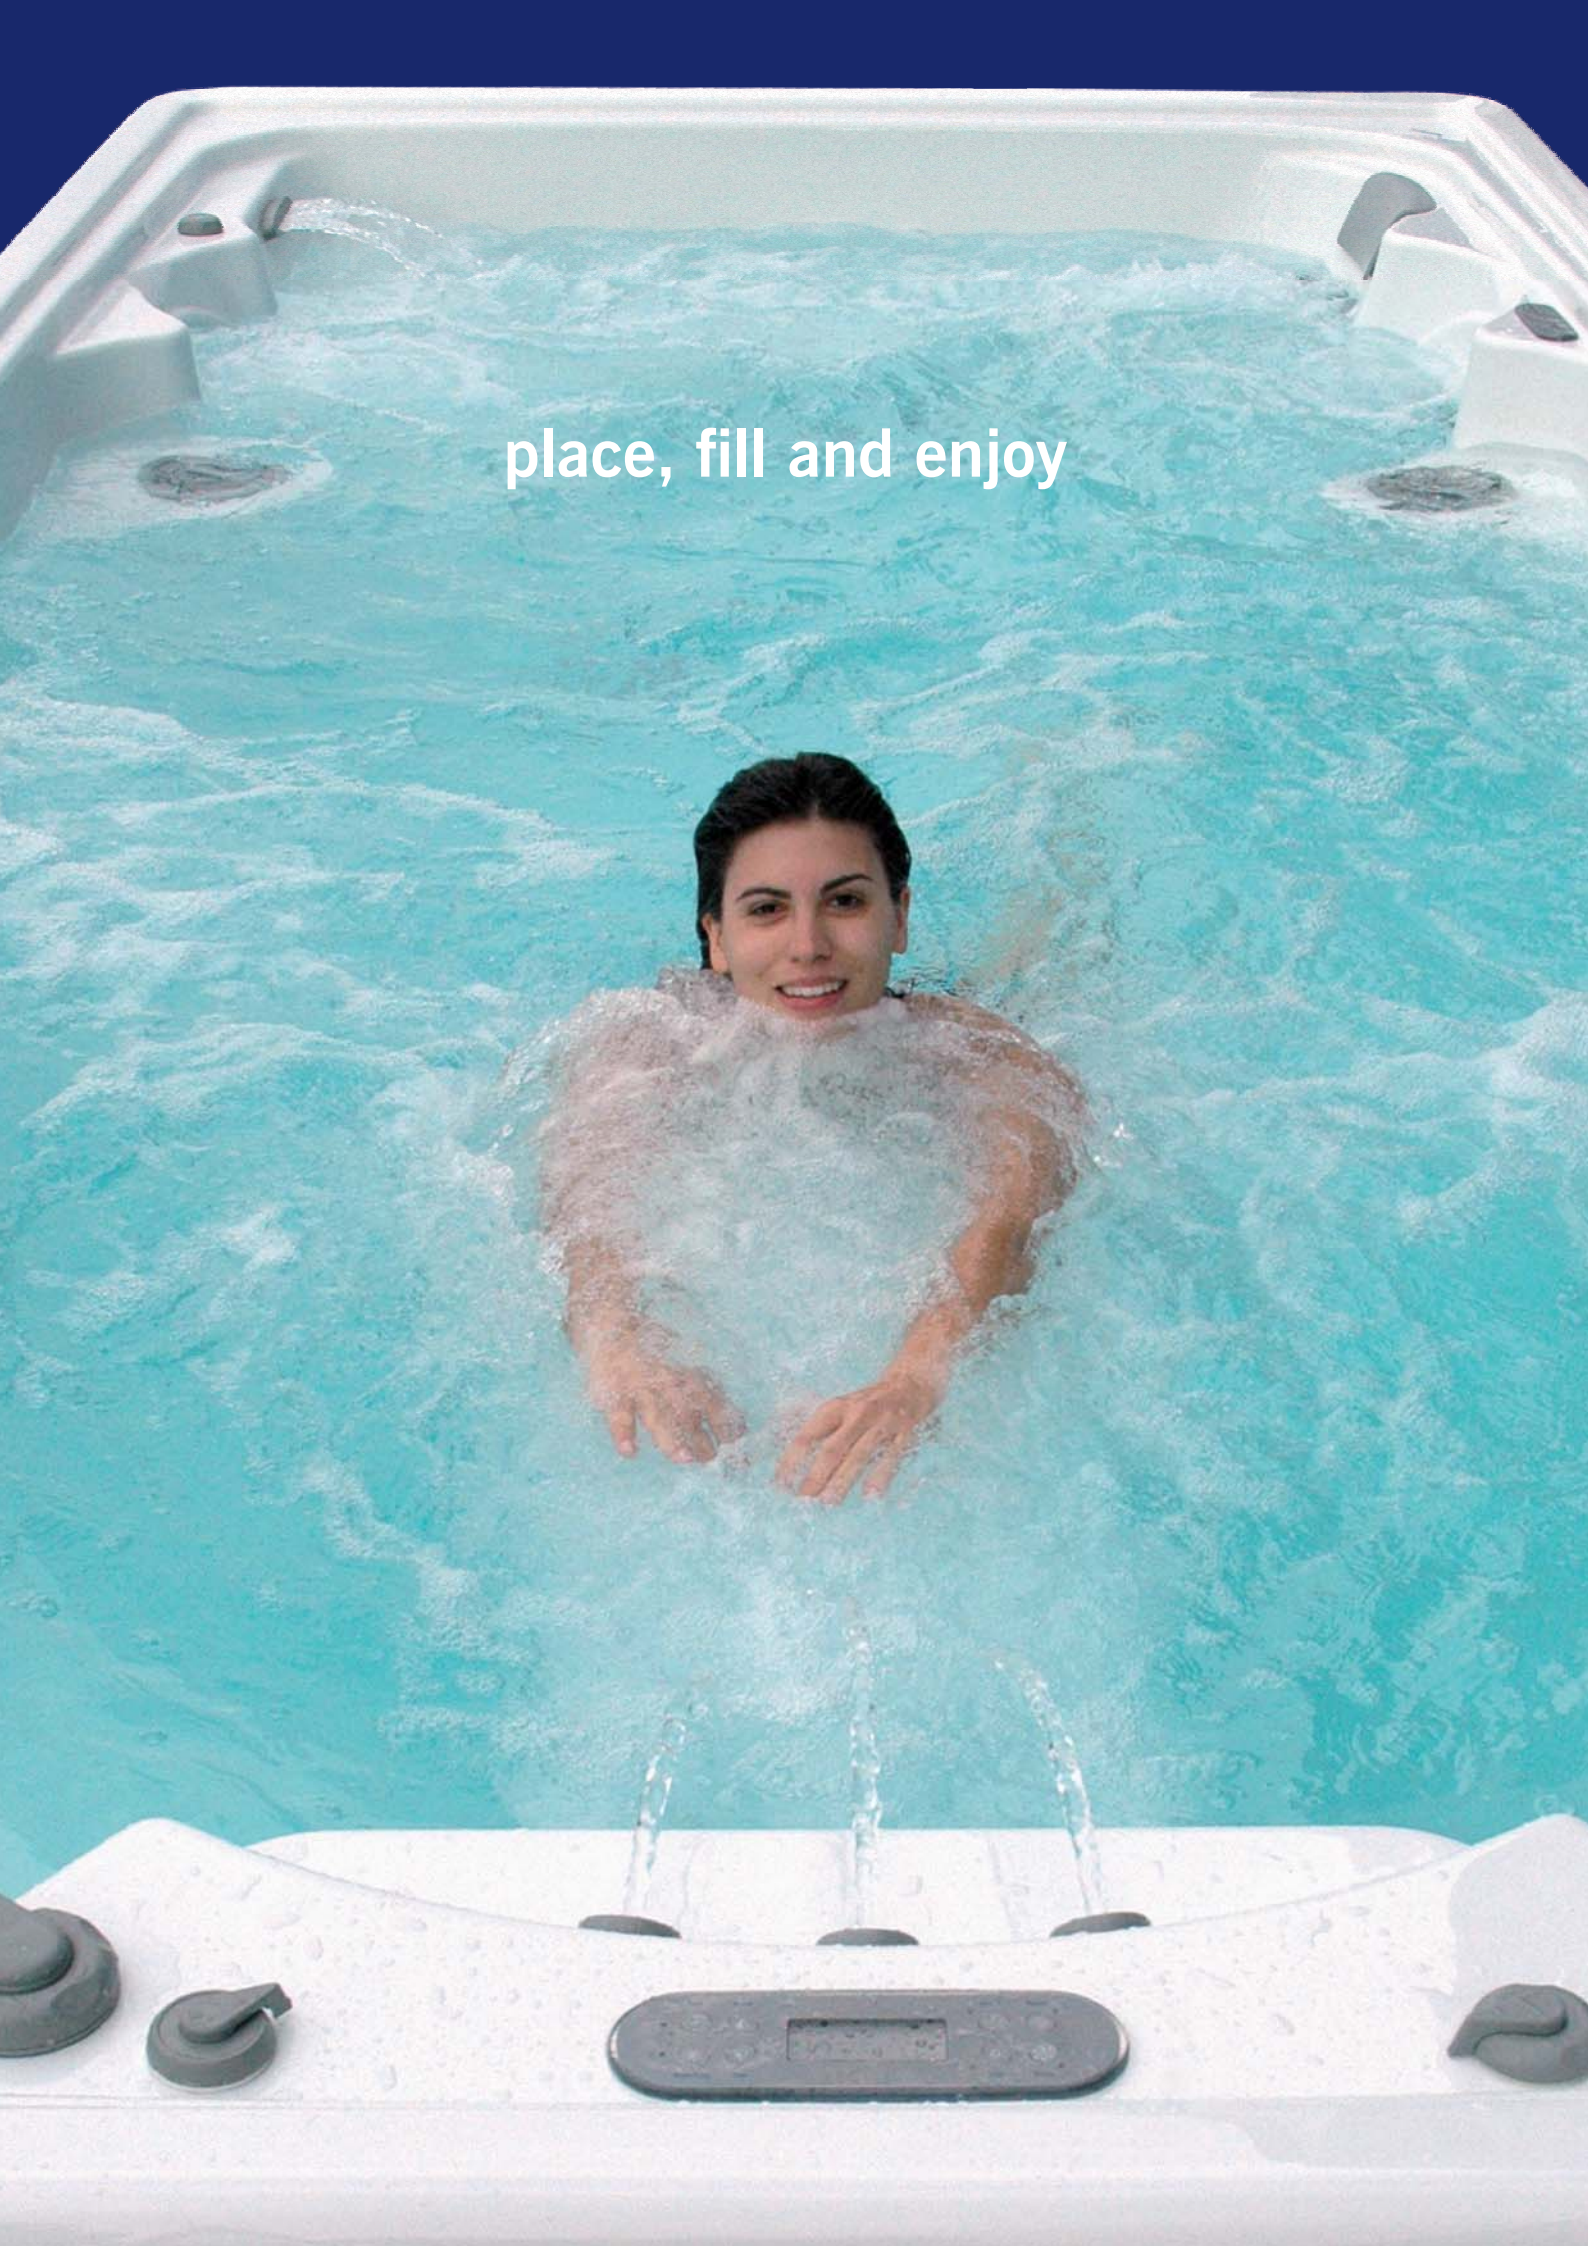

With your rigid cover you will save electrical and chemical consumption, will reduce the pollution and will avoid the evaporation

In addition it will act as protection for the children

place, fill and enjoy

SWIM SPA MEDITERRANEA

Fitness pool and spa

The revolutionary new Swimspa Mediterranea will change the previously-held conceptions we have about spas and pools. The Swimspa Mediterranea is two in one: a pool that can be used for exercise plus a jet massage area where you can relax after a hard day's work... and all this within your own home!

In just 10 m², you can enjoy a wonderful, climate-controlled pool in your home that you can use for swimming, aerobic exercise or relaxation.

Swim, practice water aerobics or relax

SWIM SPA MEDITERRANEA

Fitness pool and spa

A complete hydromassage, to relax all your senses

The Swimspa Mediterranea has an incorporated deck chair and seats with a complete hydromassage, so you can relax your entire body.

Hydromassage is a natural solution that helps to alleviate and improve discomfort, such as stress, anxiety and insomnia caused by today's lifestyle.

It is also an excellent ally when treating numerous diseases, as well as bone and muscle injuries.

The distribution of jets in the Swimspa Mediterranea has been carefully studied in order to offer you a complete full body massage.

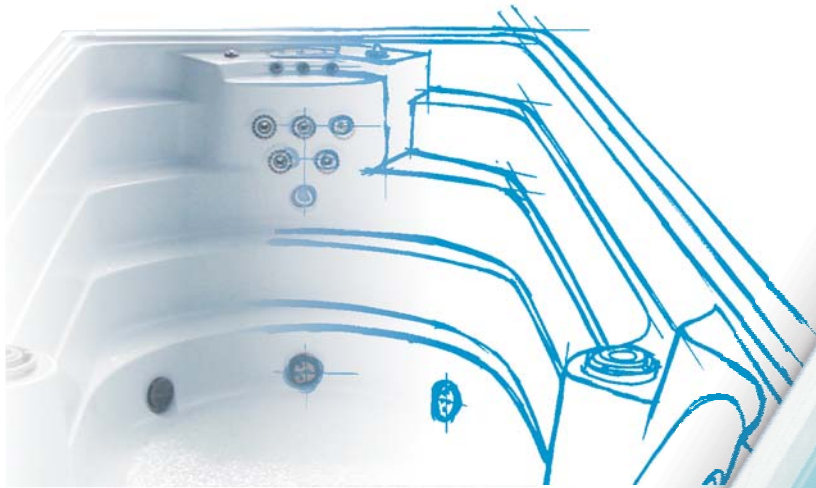

Benefits for your health

The Swimspa Mediterranea offers a place where you can swim or exercise in the water. For swimming, the pool has jets that create a strong current with an easily adjustable intensity that make it adaptable to any user. In very little space you will be able to obtain all the benefits of a large lap pool.

In addition to laps, you will also be able to do many water exercises, such as aquagym, in your Swimspa Mediterranea, which also offers many health benefits: it increases circulation, helps correct posture, tones muscles, improves respiration, improves flexibility and strength, improves cardiovascular conditioning and provides deep relaxation

And all of that with the safety of exercising in the water, without the risk of falls or injuries.

Exclusive design

When designing the Swimspa Mediterranea, we took great care with every detail. Soft curves are integrated with vanguardist lines to make a truly elegant space.

We have taken ergonomics into consideration

All the positions of the Mediterranea are very ergonomic, designed so that any person of any age will be able to receive the maximum benefit.

The wide stairs make accessing the pool very comfortable. Both sides may have an access, which allows the pool to be configured in many different ways.

SWIM SPA MEDITERRANEA

Fitness pool and spa

Quality in every sense

The Swimsa Mediterranea is manufactured completely in Europe. Not only have we taken great care with the design, but the interior has also been equipped with all the elements necessary for this fitness pool to be a highly reliable product. The lining, the structure and all the components used are of a proven high quality.

The Mediterranea includes a built-in filter and adjustable heating system so you can enjoy it all year long.

Very easy to install

Installation of the Swimsa Mediterranea is very simple: choose the best location, fill it with water, connect it and enjoy! It can be installed indoors or out. In the technical specifications you will find the different options available and can choose that which most closely adapts to your desires.
