

#### DMX ADDRESSING MANUAL WITH SYNCRONORM V:NANO

This guide shows how to check and change/set DMX address thorough RDM, to devices connected to the DMX bus. This example refers to a 67410 DMX PUMP S, connected to a Syncronorm V:Nano 1024 Controller. If other DMX-RDM controller is used, please check its manual to set DMX addresses.

Connect the pump dmx cable to the V:Nano.

The following picture shows the main screen that appears switching on the V:Nano.

# FLUIDRA INDUSTRY METALAST

## DMX ADDRESSING MANUAL WITH SYNCRONORM V:NANO

1) Press the "Down Arrow" to move through the menu until arrive to the 5th option "RDM DMX 1".

This option shows how many pumps are connected.

2) Pressing the "Right arrow", the option to see the device list connected to syncronorm is shown.
