

# ASTRALPOOL – KIT SPLASH

## Children's pool maintenance kit.

- Dichlor granules for disinfecting the pool
- Concentrated algicide

### Disinfection

GRANULATED	DURATION

### Algicide

LIQUID	DURATION

## CARACTERÍSTICAS

KIT SPLASH contains two products:

- ASTRALPOOL – 200gr Chlorine Shock: Granular compound by means of which bacteria, viruses, fungi and organic matter present in the water are quickly eliminated.
- ASTRALPOOL - 500s Algicide concentrated: Fast-acting algaecide compound for the prevention of algae in water.

## MODO DE EMPLEO

Always adjust the pH before adding chlorine to the water to make it as effective as possible.

Spread the dose of product evenly over the pool surface. The addition of the product should preferably be done at dusk and without the presence of bathers in the pool water.

The free residual chlorine should always be between 0.5-2mg/l, a value that can be easily measured using a chlorine and pH analyzer kit. This control should be carried out at least twice a day.

## DOSIFICACIÓN

**Initial Treatment** (pH adjusted):

- 1) Add 15 grs. (\*) of ASTRALPOOL - 200GR for each m<sup>3</sup> of water.
- 2) Add a dose of 10ml of ASTRALPOOL - 500s for each m<sup>3</sup> of water.

**Maintenance Treatment** (With the pH of the water adjusted):

- 1) Add daily 1 to 3 grs. (\*) of ASTRALPOOL - 200GR per m<sup>3</sup> of water daily.
- 2) Add once a week 2.5ml of ASTRALPOOL - 500s for each m<sup>3</sup> of water.

(\* 1gr or 1ml is equivalent to approximately 1 teaspoon).

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
