

ctx41 FLOCCULANT

Shock treatment that removes the particles from the water that turn it cloudy

- Clarifies the water, restoring transparency.
- Fast-acting.
- Improves disinfectant output.

FORMATO LIQUIDO	TIEMPO DE EFECTIVIDAD	TODO TIPO DE PISCINAS	DOSIS
	8h		100ml /10m ³

PROPERTIES

Appearance	Liquid
Colour	Colourless
Apparent density	1,16 - 1,26 g/cm ³
pH de solución acuosa al 1%	3,5 - 4-5

CHARACTERISTICS

A polymer flocculant with great coagulating and flocculating properties. Capable of removing particles in suspension found in pool water.

Product with great capacity to eliminate metal ions such as iron and magnesium, as well as the tiniest particles found in swimming pool water and that the filtration equipment cannot retain due to their minimum size.

Mejora la calidad bacteriológica del agua y en consecuencia reduce el consumo de los productos empleados en la desinfección.

INSTRUCTIONS FOR USE

Ensure the filtration equipment is switched off and the pool empty of bathers before pouring the necessary dose of product in a container with water and distributing evenly over the pool water surface.

After 8 hours eliminate the flocs formed and deposited on the bottom of the swimming pool with a pool cleaner.

DOSAGE

Tratamiento de recuperación : Add 10 ml. of product for each m³ of water.

Tratamiento de mantenimiento: This can be carried out by means of a metering pump, injecting 0,5 ml. of product for m³ of circulating water prior to the filter.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
