

ASTRALPOOL – LIQUID FLOCCULANT

Clarifies water

- Clears cloudy water
- Rapid effect

LIQUID	DURATION	ALL TYPES OF POOLS	DOSAGE
			100ml / 10m ³

PROPERTIES

Appearance	Liquid
Colour	Colourless
Apparent density	1,16 - 1,26 g/cm. ³
pH (water solution 1%)	3,5 – 4,5

CHARACTERISTICS

Product with great capacity to eliminate metal ions such as iron and magnesium, as well as the tiniest particles found in swimming pool water and that the filtration equipment cannot retain due to their minimum size.

Improves the bacteriological quality of the water and consequently reduces the consumption of the products used in disinfection.

INSTRUCTIONS FOR USE

Ensure the filtration equipment is switched off and the pool empty of bathers before pouring the necessary dose of product in a container with water and distributing evenly over the pool water surface.

After 8 hours eliminate the flocs formed and deposited on the bottom of the swimming pool with a pool cleaner.

DOSAGE

Recovering treatment: Add 10 ml. of product for each m³ of water.

SOLUTION

4 FLOCCULANT

Maintenance treatment: This can be carried out by means of a metering pump, injecting 0,5 ml. of product for m³ of circulating water prior to the filter.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
