

PERFORMANCE MADE SIMPLE

SWY 3500

SWEEPY®

1 DESIGNED FOR SIMPLICITY

Designed to bring simplicity and performance to flat or slightly inclined pools, the Sweepy® can handle any type of pool surface thanks to its tracks and cleans pools up to 8 x 4 m in a single cycle.

2 CYCLONIC PERFORMANCE

Equipped with Zodiac® patented technology cyclonic suction, Sweepy® performance is maintained throughout its cleaning cycle. Combined with its active front brush, and a cycle that covers the floor, walls and waterline, the cleaner will easily remove the debris present in the pool.

3 EASY TO USE

At the end of the cycle, its 3L filter is accessible from the top of the cleaner and can be removed without having to be in contact with the debris. A simple jet of water is enough to clean rapidly the filter canister and put back in place in the robot for its next cycle. The control box is simple and intuitive to use with only a start and stop button to manage the cleaning cycle.
