

ctx550 WINTERSTAR

Complete treatment in winter

- Prevents algae and bacteria proliferation.
- Prevents the formation of lime.
- Non-foaming.

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	3 MONTHS		500ml /10m³

PROPERTIES

Appearance	Liquid
Colour	Bluish green
Density	1,08 - 1,18 g/cm ³
pH	0 - 1,5

CHARACTERISTICS

Product for the maintenance of uncovered pools during the winter period, avoiding the growth of algae and bacteria which cause unclean water calcareous sediments.

INSTRUCTIONS FOR USE

With the pH value of the water between 7.2 and 7.6, pour the necessary dose of product directly into the pool water. Being necessary to put the filtration equipment into operation, long enough to obtain a good distribution of the product in the water.

DOSAGE

When the bathing period is over and maintenance has not yet been abandoned, Add ctx 200gr ClorShock (15grs./m3). The next day add 5 litres of ctx550 WinterStar for 100 m3 of water. It is recommended that this process be repeated half way through the winter period.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
