

ctx130 BROMO 20G

Bromine treatment to disinfect the pool

- Very slow-dissolving and continuous disinfection.
- Pleasant bathing, no odors.
- Does not irritate eyes.

TABLET	EFFICACY	ALL TYPES OF POOL	DOSAGE
20g	WEEKLY		Dispenser for 1.0-3.0ppm

PROPERTIES

Appearance	Solid tablets
Colour	White
Available chlorine content	53 - 65%
pH (1%)	4.0 ± 1.0
Solubility (25°C)	0.15 g / 100cm ³ agua

CHARACTERISTICS

Bromine tablets is an effective disinfectant against bacteria, algae and fungi; its disinfecting capacity does not depend on pH as long as it is between 7 and 8. Its high oxidizing power allows it to destroy all organic material present in the water.

The bromamines do not produce eye irritation or unpleasant smells. Therefore bromine tablets are an ideal product for treating water in spas and indoor swimming pools.

The dosage system, using the bromine tablets dispenser, provides the correct level of disinfectant; so that the swimmers are protected and excessive use of the product is avoided.

INSTRUCTIONS FOR USE

Once the pH of the water has been balanced 7,2 and 7,6, fill the dosing apparatus (Brominator) with Aquabrome tablets; regulate the dosing apparatus to obtain the desired level of Residual Bromine.

DOSAGE

The recommended quantities of Residual Bromine are as follows:

- Private Pool: 1-3 ppm;
- Private Spas: 2-4 ppm;
- Public Pool: 3-5 ppm;
- Public Spas: 2-5 ppm.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
