	30 MIN.		

PROPIEDADES

Appearance	Liquid
Colour	Orange
pH (5% 20°C)	0 - 1
Density	1,225 ± 0.02 g/cm ³

CARACTERÍSTICAS

Liquid cleaning product specially designed for the elimination of calcareous encrustations, organic residues and mineral sediments which form with time and which adhere to the surfaces of swimming pools (beaches, floating lines, steps, etc.) built in polyester and fibreglass.

It is a product designed for cleaning the pool's glass. It works by rapidly penetrating and removing stains of oxides, fumes and various dirt.

MODO DE EMPLEO

1- General cleaning of empty swimming pools:

Apply undiluted product to the surfaces to be cleaned, spreading the product all over walls and bottom. Let the product penetrate for approximately ½ hour and then rinse with abundant water. If the encrustation persists, repeat the operation.

In areas where the incrustation is very acute, it is advisable to assist the action of the product by scrubbing the area with a brush.

2.- Surface Cleaning:

Use the product pure or in a 10-20% aqueous solution, depending on the type of dirt to be removed. Apply by spraying, flooding or soaking, leaving it to act as long as necessary.
