

ctx1698 CARE PODS

Multiaction 3 in 1 single dose with water-soluble film

- Prevents water turbidity.
- Prevents the development of algae.
- Prevents foam generation.
- Immediate effect.
- Its efficacy is not altered by possible increases in temperature or pH variations.

POD	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	WEEKLY		1  up to 50m ³

PROPERTIES

Appearance	Powder in water soluble film
Colour	White
pH (1%)	4,2 ± 1
Weight (pod)	35 g

CHARACTERISTICS

The Care Pod removes phosphates (algae food) while removing the remains of oils and/or body creams, it also clarifies the water thanks to its flocculation capacity.

The Care Pod is based on a natural component (Chitosan) which makes it non-foaming and compatible with most disinfection treatments, as well as any type of filter.

INSTRUCTIONS FOR USE

Pour the dose of product into the skimmer or directly into the pool basin (in the deepest part) and then turn on the filtration system. The addition of the product should preferably be done at dusk and without the presence of bathers in the pool water.

This product must be accompanied by the usual pool water disinfection treatment.

Note: The use of Care Pods may cause turbidity of the pool water in the initial phase. This is normal and indicates that the product is working, it will disappear in a few minutes. Use a pod when the water is around 20° C.

DOSIFICACIÓN

Add 1 Care Pods of product per 50 m3 of water per week.

This dosage is for guidance only and can be modified according to the characteristics of each pool, climate, etc.
