

## pH PLUS

Granulated compound, which increases the pH level of the water when it is lower than 7.2. It is essential for proper water treatment, ensuring that bathers' skin is not irritated by a pH imbalance.

### PROPERTIES

Appearance	Crystalline solid
Colour	White
Apparent specific density	1.0 kg/dm <sup>3</sup>
pH of a 0.4% water solution	11.17
Solubility in water at 20°C	215 g/l

### DOSAGE

Add 15 g of product to increase by 0.2 units the pH of 1 m<sup>3</sup> of water.

These doses are the ones suggested and can be modified according to the own characteristics of every spa, climate, etc.

The perfect pH balance should be between 7.2-7.6. The pH level is easily determined by using a pH and chlorine test kit and should be carried out twice daily.

### INSTRUCTIONS FOR USE

If the pH is lower than 7.2, without the presence of bathers in the spa, pour the necessary amount of product evenly throughout the surface of the spa.
