

Certikin Optimus Range

The choice of pool fittings can make or break the overall impression of a pool. To add that perfect finishing touch and extend the options available, Certikin offer the attractive Optimus Range of Flow Fittings.

Suitable for both liner and concrete pools, the Optimus range blends beautifully with darker pool finishes as it comes in an attractive metallic grey or black plastic.

With the popularity of salt chlorinators on the increase this new range offers the ideal solution for corrosion free flow fittings. Products include skimmers and extension throats, wall inlets, vacuum points and main drains with anti vortex grille.
