

# ASTRALPOOL –SUPER DESCALER

## Prevents limescale and staining

- Prevents the formation of limescale and stains on the walls, stairs and bottom of the pool
- Eliminates filter calcification
- Non-foaming, helps keep water clear

LIQUID	EFFICACY	ESPECIAL AGUAS DURAS	DOSAGE
			200ml / 10m <sup>3</sup>

## PROPERTIES

Appearance	Liquid
Colour	Colourless
pH (5%)	0 - 1
Density (20%)	1,34 - 1,38 g/cm. <sup>3</sup>

## CHARACTERISTICS

ASTRALPOOL - 700 Super Descaler controls the formation of limescale and stains due to iron in swimming pools. It can prevent the formation of limescale on walls, stairs and pool bottoms due to hard water. It also avoids the formation of stains in the glass produced by iron.

It keeps clean the water recirculation circuits, filters, pumps and heat exchanger that favors the filtration of the pools.

ASTRALPOOL - 700 Super Descaler is a non-foaming product, easy to use, which helps to keep the pool water clearer and shinier. At the same time it is fully compatible with all disinfectants, algacides and biocides (chlorine, oxygen, anti-algae, etc.) of the ASTRALPOOL product range.

## INSTRUCTIONS FOR USE

Dilute the required amount of product in a container with water and spread the solution evenly over the entire surface of the pool, keeping the filtration equipment running.

### DOSAGE

**Initial Treatment:** At the beginning of the bathing season, add 2 Lts. of product per 100 m<sup>3</sup> of water to the pool water.

**Maintenance treatment:** Add 1 to 2 liters of product per 100 m<sup>3</sup> of water once a week.

In pools with hardness above 45°F and temperatures of 28°C, the product dosage should be increased by 25 to 50% more.

Important: In all cases where the water contains iron, it is important to add ASTRALPOOL - 700 Super Descaler to the pool water before chlorination or any oxidizing treatment.

These doses are for guidance only and can be modified depending on the hardness and salt content of the water.
