MR/M2 Breakable Coupling test Report

We, ADB bvba, a Belgian company established & operating under the Belgian Law at 585, Leuvensesteenweg - 1930 Zaventem - Belgium, hereby certify that the MR/M2 breakable couplings are designed, produced and tested in our factories, using the best materials and manufacturing processes.

This type of breakable coupling is random tested by sampling for the breaking moment, the results are :

- Minimum breaking moment: 45 mKg
- Maximum breaking moment: 64 mKg

This breakable coupling is by consequence suitable for mounting any Runway ADB elevated fitting at ground level, in the runway area. It is compatible with our conduit elbows, tripods & baseplates. It is not suitable for mounting L-804 Runway Guard lights.

Issued at Zaventem - Belgium by ADB bvba.
